QUESTION 1

What are the steps for adding a component to the current page at run time?

A. Click the Settings tab, click the New/Edit Component, and then click the Add New button.

B. Click the Edit Page icon and drag the component from the resource catalog to the desired spot on the page.

C. Click the Settings tab, click the View Resource link, and then Click the New Component button.

D. Open the ComposerContent.xml file from Portal Builder and add an entry into the [New Component] section.

Correct Answer: B

QUESTION 2

Your customer has configured Oracle Secure Enterprise Search (SES) with Oracle WebCenter Portal. The customer is complaining about the search results not including secured resources. The WebCenter Diagnostic log file indicates the below error:

Received status "failed" during proxy login with application entity "weblogic" to Oracle SES at http://host:port/search/query/OracleSearch, as search user "vicki". Defaulting to public. Which three actions are necessary to resolve the issue?

A. Confirm that Oracle SES is configured with an identity management system to validate and authenticate users.

B. Confirm that WebCenter Portal and Oracle SES use different identity management systems (Active Directory or Oracle Internet Directory).

C. All repositories (such as WebCenter Portal, WebCenter Content Server, and Oracle WebCenter Portal Discussions Server) must share the same user base as Oracle SES.

D. Oracle SES must have a trusted entity for allowing WebCenter Portal end users to be securely propagated at search time.

Correct Answer: BCD

QUESTION 3

Which two portal/shared assets show up on a portal page when it is being viewed?

A. Page templates show up because they are the building blocks of a page.

B. Navigation model shows up on a page as links, and any such visualizations

C. Resource Catalog shows up indicating all the items that can be added to the page.

D. Data Controls

Correct Answer: BC

QUESTION 4

WebCenter Portal supports any mail server with IMAP4 and SMTP protocol support. Which server distribution, however, has specific integration support within WebCenter Portal?

A. IBM Lotus Notes

B. MS Exchange

C. UNIX Mail Server

D. Google Mail Server

E. Oracle Beehive

Correct Answer: E

QUESTION 5

When developing custom task flows for a Portal application, you should ensure that _____.

A. no custom task flow contains any JavaScript

B. the correct ADF version is used for your version of Portal environment

C. the Content Repository is running, because this is where the task flows are stored

D. all CSS styling of the task flows is kept within the taskflow, because Portal Skins cannot change the look and feel of a custom task flow

Correct Answer: D
