QUESTION 1

Which configuration step is performed in an OBIEE (Oracle Business Intelligence Enterprise Edition) environment?

A. adding the BI (Business Intelligence) folder to the portal resource catalog

B. configuring BI connection

C. deploying WCP (WebCenter Portal) extensions for OBIEE

D. creating the BI Impersonate User

Correct Answer: A

QUESTION 2

Which statement is true?

A. If you want to use a certain page style to create a portal page, you have to upload it on the assets page of this portal.

B. You cannot create a subpage that has a different security from its parent.

C. When creating a portal page/subpage for a new portal created in 11.1.1.8, you are also creating a navigation item for its default portal navigation.

D. You cannot change a portal page\\'s direct URL after its creation.

Correct Answer: C

QUESTION 3

What technology is used for writing Content Presenter display templates?

A. HTML

B. ADF

C. PHP

D. JavaScript

Correct Answer: B

QUESTION 4

Your client is developing page templates and pages for their portal using primarily Portal Builder. During the process of building this Portal, the client uses Portal Builder and JDeveloper. Identify the initial step required to perform this round-trip development.

A. Choose the "Save Portal" option in the Portal Administration page.

B. Export the WebCenter Portal\\'s database schema.

C. Choose "Export" from the portal assets page in the Portal Builder page and save the portal asset to an archive.

D. Connect JDeveloper to the Portal server and edit the asset online.

Correct Answer: B

QUESTION 5

You create a Content Presenter Template with the following source code:

What does this code mean?

A. This template will render a single Site Studio file. It includes a Region Definition called RD_NEWS, and the following attributes: Title, Lead, and Image.

B. This template will render multiple Site Studio files. It is a list (static or dynamic) of elements of a Region Definition called RD_NEWS, which has the following attributes: Title, Lead, and Image.

C. This template retrieves a document with the RD_NEWS Content Type, and renders the following metadata fields: Title, Lead, and Image.

D. This code is wrong. The Region Definition name should be declared in the node variable, not in the propertyMap method.

Correct Answer: B
