QUESTION 1

After a task flow has been deployed as a new shared library, which step is required in the portal extension project to make this task flow visible from WebCenter Portal?

- A. Update only weblogic.xml.
- B. Update only MANIFEST.MF.
- C. Update both files.
- D. None, because a shared library is used.

Correct Answer: C

QUESTION 2

Which statement is not true?

- A. Responsive Design allows a page to change content visibility and or layout in the browser if the browser is resized.
- B. A page using Responsive Design is refreshed in the portal server when the size of the browser is changed.
- C. Responsive Design includes adding server-side logic to conditionally display areas on a page.
- D. Responsive Design allows pages to target more than one device size or orientation.

Correct Answer: D

QUESTION 3

Which two portal/shared assets show up on a portal page when it is being viewed?

- A. Page templates show up because they are the building blocks of a page.
- B. Navigation model shows up on a page as links, and any such visualizations
- C. Resource Catalog shows up indicating all the items that can be added to the page.
- D. Data Controls

Correct Answer: BC

QUESTION 4

A client has a requirement to integrate BI Reports from BI Dashboard with WebCenter Portal. However, when a user clicks the BI server connection in the Portal's Resource Catalog, he or she is unable to see

any reports from BI Publisher. But when a user clicks the BI server connection in the WC, he or she is unable to see any reports from BI Publisher.

What is the reason for this?

- A. You need to import the BI Publisher connection into WebCenter Portal.
- B. The user does not have permissions to view BI Catalog on BI Publisher.
- C. The user needs to have the permission on the BI Publisher connection in WebCenter Portal.
- D. The user needs to have the permission on BI Task Flows.

Correct Answer: D

QUESTION 5

On a normally well-performing environment, you are experiencing unexpected slow response times, or no server response, for some page requests in WebCenter Portal? You are attempting to debug this issue starting at WLS.

Which two diagnostic steps should you take to resolve this issue?

- A. Submit more requests to the server to see if it responds.
- B. Check the WLS admin console to see the status of the managed server.
- C. Check the diagnostic log file for the managed server to see if there are STUCK threads.
- D. Perform a cold restart of the server.

Correct Answer: CD
