QUESTION 1

What are three message content and context search examples for transaction that can be performed with Oracle Enterprise Manager Transaction Management?

A. By customer ID

B. By input ID

C. By message rejection

D. By time of arrival

E. By message type

Correct Answer: ADE

Providing a complete end to end solution, Oracle Enterprise Manager 11g introduces Business Transaction Management (BTM) which provides sophisticated instrumentation for real-time detection, alerting, and remediation of various types of unexpected business or technical conditions. Using BTM, application support personnel can search transactions based on message content and context--such as time of arrival (D), message type (E), or client credentials (A)--to narrow-down the root cause.

QUESTION 2

Which statement is true about Oracle Enterprise Manager Cloud and Virtualization management?

A. It can perform live migration of the Hypervisor.

B. It can perform live migration of ANSI-compliant Virtual Machines.

C. It can perform live migration of Oracle VMs.

D. It can perform live migration of storage pools.

Correct Answer: C

Live Migration

To take advantage of Enterprise Manager Ops Center\\'s live migration capability, the server pool must be configured with the following:

*

 Oracle VM for SPARC 2.1 or higher (2.2 is recommended)

*

 The SPARC T4 server has a minimum firmware level of 8.1.1 (8.2.0f or higher is recommended)

*

 All networks and storage libraries are physically presented to all servers in the server pool as well as being defined in

Enterprise Manager Ops Center

*

 All CDOMs have network connectivity to all other CDOMs in the server pool.

*

 The agent on the CDOMs is must be online.

QUESTION 3

Identify three key capabilities of Oracle Enterprise Manager Cloud Control Consolidation Planner.

A. Automatically generating a business justification and ROI document

B. Determining likely candidates for consolidation

C. Consolidating physical and virtual environments

D. Identifying under or over utilized servers

E. Identifying and compressing overlapping data

Correct Answer: BCD

C: The Consolidation Planner feature enables you to match managed servers you want to consolidate with the generic physical machines, Oracle Exadata database machines, or Oracle Virtual Machine (VM) servers they can be consolidated to.

B, D:

/ The goal of consolidation is to identify such under-utilized servers and find a way to consolidate them, enabling the enterprise to free up as many servers as possible while continuing to maintain service levels.

Note:

/ Compare the consolidation scenarios you create to determine which consolidation strategy best meets your requirements.

Your objective is to:

*

 Match source server resource requirements with destination servers best able to meet those requirements

*

 Fit source server requirements with each destination server\\'s available resources as tightly as possible, so you can get maximum usage of destination server capacity

*

Optionally balance the source server workload across all available destination servers Reference: Oracle Enterprise Manager Cloud Administration Guide , Using Consolidation Planner

QUESTION 4

What can the Oracle Enterprise Manager Ops Center firmware profile do?

A. Filter based on system type

B. Provide rolling upgrade capability

C. Modify firmware settings

D. Aggregate firmware images

Correct Answer: C

Oracle Enterprise Manager Ops Center uses firmware profiles to provision, or update firmware on an asset.
