### QUESTION 1

Identify three for Oracle Enterprise manager that have Configuration Change Control functionality?

- A. Application management Pack
- B. Database Lifecycle Management Pack
- C. WebLogic Management Pack
- D. Real User Experience Insight Pack
- E. Data Masking Pack

Correct Answer: ABC

---

### QUESTION 2

What is the primary purpose of the Middleware Diagnostics Advisor (MDA) that is included in Oracle Enterprise Manager WebLogic Server management Pack Enterprise Edition/

- A. To provide configuration data reports and best practices.
- B. To provide root cause analysis and recommendations based on performance metrics and configuration data of the stack (WLS, JVM, application, database, and hosts)
- C. To correlate JVM threads with the underlying database tier to provide across-tier root cause analysis and to generate reports showing database usage related to the JVM
- D. To alert on Java memory leaks in WebLogic Server

Correct Answer: B

The Middleware Diagnostics Advisor analyzes the entire stack and provides diagnostic findings by identifying the root cause of a problem. It correlates and analyzes the input and offers advice on how to resolve the problem. Reference: Managing Middleware Targets

### QUESTION 3

Which three components are part of the Oracle Enterprise Manager infrastructure?

- A. Oracle Management Service (OMS)
- B. Management Agent
- C. 10g Reporting Database
- D. Real User Experience Insight
- E. Repository Database

#### F. Oracle Universal Installer

Correct Answer: ABE

A: The Oracle Management Service (OMS) provides the services used to coordinate the storage of management information and the automation of management activities for all entities managed in the network. It also includes facilities for serving the web-based user interface, which is the Cloud Control console.

B: The Management Agent is the lightweight process that acts as a proxy for Enterprise Manager on the various hosts in the network where entities that Enterprise Manager manages are located. It communicates with the OMS to collect and deliver monitoring information and to coordinate management activities executed against the management entities.

E: The Management Repository is the Oracle Database that stores all important management information for the entities managed by Enterprise Manager. The Oracle Management Service (OMS) uses the Management Repository to store and retrieve key information, such as monitoring data.

#### QUESTION 4

The shared file system loader configuration on the Oracle Enterprise management Service is for \_\_\_\_\_.

- A. Auditing
- B. Security
- C. High availability
- D. High availability and security

Correct Answer: C

The Management Service for Grid Control has a high availability feature called the Shared Filesystem Loader. In the Shared Filesystem Loader, management data files received from Management Agents are stored temporarily on a common

shared location called the shared receive directory. All Management Services are configured to use the same storage location for the shared receive directory. The Management Services coordinate internally and distribute among themselves

the workload of uploading files into the Management Repository. Should a Management Service go down, its workload is taken up by surviving Management Services. You must choose a shared receive directory that is accessible by all the

Management Services using redundant file storage.

Note:

Oracle strongly recommends you to configure a shared file system loader so that a common location is maintained to store all the metric data files uploaded by the Management Agents.

---

#### QUESTION 5

Which two Oracle Enterprise Manager functionalities can reuse the application-Specific user session recordings from

Oracle Enterprise Manager Real user Experience Insight (RUEI)?

- A. Application Testing Suite
- B. Application Replay
- C. Application Workload Generator
- D. Configuration Management
- E. Compliance Management

Correct Answer: BD

B: In order to capture Web application workloads, Application Replay uses Oracle Real User Experience Insight (RUEI).

D: You can install the Configuration Change Console (included in the Configuration Management Pack) if you want real-time configuration change monitoring. Real-time configuration monitoring means continuous detection, validation, and alerting of any configuration change that could be authorized or unauthorized.
