QUESTION 1

You are deploying connectors on Oracle Linux systems. As part of the process, you must create a new directory in the target system that will be used by the connector when interfacing with Oracle Identity Governance and the/etc/passwordand/etc/shadowfiles.

Identify the goal of this directory, and explain how Oracle Identity Manager uses that access.(Choose the best answer.)

A. Create a directory on the target system where the connector can log events. The default directory is/var/logs/oim/connectors.

B. Create a directory on the target system where the connector can create mirror files for the/etc/passwordand/etc/shadowfiles. This directory is specified in themirrorFilesLocationentry of theLookup.UNIX.Configurationlookup definition. The default value is/etc/connector_mirror_files.

C. Create a directory on the target system where the connector can store temporary files when running the reconciliation process. These files will be stored until the reconciliation is completed. The default directory is/var/oim/temp/ connectors.

D. Create a directory on the target system where the connector can create backup files for the/etc/passwordand/etc/shadowfiles. Thisdirectory is specified in themirrorFilesLocationentry of theLookup.UNIX.Configurationlookup definition. The default value is/etc/connector_backup_files.

Correct Answer: D

QUESTION 2

A customer wants the ability to approve or reject requests from the approval notification itself.

What option or component should you configure to enable this feature through SOA composite application?(Choose the best answer.)

A. With the SOA composite tool, add input parameters for the Human Task. Then click the Add icon and add a string parameter called Notification. Set the parameter as the following data type: {http://xmlns.oracle.com/request/ NotificationActionalbe}OtherDetails

B. Set up a new Oracle business rule called Notification and set the Then action as follows:CallNotificationActionableResource(User : Null, Groups : "Manager", "Environment Owner", Response Type: required, ruleName: "Rule1", list:List)

C. With the SOA composite tool, select the Approval Human Task from your workflow and click Notification. Specify when you want a notification message to be sent to the assignee or requester, and then make the notification actionable.

D. With the SOA composite tool, add input parameters for the Human Task. Then click the Add icon and add a string parameter called Notification. Set the parameter as the following data type: {http://xmlns.oracle.com/request/ RequestDetails}OtherDetails

Correct Answer: C

QUESTION 3

You are asked to set up a connector that will link to a target system to create, delete, update, enable, and disable user accounts.

Identify the interface that is required to enable entities through this custom connector.(Choose the best answer.)

A. org.identityconnectors.framework.spi.operations.CreateOp

B. org.identityconnectors.framework.spi.operations.EnableOp

C. org.identityconnectors.framework.spi.operations.UpdateOp The connector API should pass all the attributes of the existing entity along with a new_ENABLE_attribute with a value oftrue.

D. org.identityconnectors.framework.spi.operations.EnableOp The connector APIshould pass all the attributes of the existing entity along with a new_ENABLE_attribute with a value oftrue.

E. org.identityconnectors.framework.spi.operations.EnableOp The connector API should pass all the attributes of the existing entity along with a new_DISABLE_attribute with a value of afalse.

Correct Answer: C

QUESTION 4

Which two statements are true about Oracle Privileged Account Manager (OPAM)?(Choose two.)

A. The communications between the CLI console and the OPAM Server do not accept SSL.

B. Passwords are reset to a random value on checkin and checkout by default.

C. All of the passwords needed by OPAM at run time are stored in the Credential Store through the Integrated Connector Framework.

D. The OPAM User Interface (UI) and Server must be deployed in different WebLogic domains.

E. OPAM authentication relies on JAVA Authentication andAuthorizationService (JAAS) support in WebLogic.

Correct Answer: BE
