QUESTION 1

You have been granted the Catalog Administrator role in Oracle Identity Manager. However, the system is restricting you from performing common administration tasks on the catalog.

What could be causing this permission issue? (Choose the best answer.)

A. You are part of an organization that does not have access to catalog items.

B. To administer the catalog, the System Administrator role is also needed along with the Catalog Administrator role. You do not have the System Administrator role.

C. Catalog Administrator Policies have been customized in the embedded OES engine.

D. The cache has state data and has not been updated with the role information.

E. In addition to the Catalog Administrator role, you need explicit privileges for each catalog item.

Correct Answer: B

QUESTION 2

Which statement is true about tracking the status of closed-loop remediation in Oracle Identity Analytics (OIA)? (Choose the best answer.)

A. Tracking reports can be run only when all remediation activities are complete.

B. Remediation details can be exported in PDF or XLS files.

C. Only overview information is available until all remediation activities are complete, after which remediation details are also available.

D. Remediation details can be exported in encrypted and digitally signed PDF files.

E. Managers can access the remediation details only after the closed-loop remediation process has completed.

Correct Answer: C

QUESTION 3

A customer wants the ability to approve or reject requests from the approval notification itself.

What option or component should you configure to enable this feature through SOA composite application?(Choose the best answer.)

A. With the SOA composite tool, add input parameters for the Human Task. Then click the Add icon and add a string parameter called Notification. Set the parameter as the following data type: {http://xmlns.oracle.com/request/NotificationActionalbe}OtherDetails

B. Set up a new Oracle business rule called Notification and set the Then action as follows:CallNotificationActionableResource(User : Null, Groups : "Manager", "Environment Owner", Response Type: required, ruleName: "Rule1", list:List)

C. With the SOA composite tool, select the Approval Human Task from your workflow and click Notification. Specify when you want a notification message to be sent to the assignee or requester, and then make the notification actionable.

D. With the SOA composite tool, add input parameters for the Human Task. Then click the Add icon and add a string parameter called Notification. Set the parameter as the following data type: {http://xmlns.oracle.com/request/RequestDetails}OtherDetails

Correct Answer: C

QUESTION 4

You want to set up a "firecall\\' account (sometimes referred to as "break-the-glass access)toa privileged account in Oracle Privileged Account Manager (OPAM).

Which statement is true? (Choose the best answer.)

A. The OPAM administrator can override the access policy by changing it for firecall requests, or the administrator can give direct access to the user.

B. The OPAM administrator can submit a request to Oracle Identity Manager for approval.

C. Users can grant access to themselves even if an access policy is violated.

D. The OPAM administrator cannot override the access policy because this would initiate a security alert.

E. The OPAM administrator cannot override the access policy because this would initiate a Segregation of Duties (SoD) violation.

Correct Answer: B
