**QUESTION 1**

You are configuring Oracle Entitlements Server (OES) and have a requirement to make a connection to an external Policy Information Point (PIP) in order to retrieve an attribute for use in a condition.

You need to modify the security module configuration to configure the PIP. Which two options do you have for making this modification?

- A. Configure the PIP settings in your OES policy and distribute it to each security module as part of the policy distribution.
- B. Manually edit thejps-config.xmlfile on each security module.
- C. Use the OES admin console to define the PIP settings and write them to a database for each security module to retrieve during bootstrap.
- D. Use the SMConfig UI to configure the settings.

Correct Answer: BD

QUESTION 2

What extra configuration must be performed only when a detached Credentials Collector is separated from a Resource WebGate and not when they are combined?
