QUESTION 1

Identify two Change Data Capture implementation strategies provided through the ODI knowledge modules.

- A. Triggers
- B. Oracle GoldenGate
- C. Extract source data to flat files
- D. Before and after database image comparison

Correct Answer: AB

QUESTION 2

Identify the right variable step type to use when assigning a value to a variable with a SQL query.

- A. Refresh Variable
- B. Declare Variable
- C. Set Variable
- D. Evaluate Variable

Correct Answer: C

Reference: http://docs.oracle.com/cd/E15586_01/integrate.1111/e12643/procedures.htm (12.2.3.1) Set Variable is the step type to "assign the value". Refresh Variable is used to "calculate the value" from a sql query.

QUESTION 3

Is it possible to manage five metadata work repositories together with ODI and a single master repository in order to have a software lifecycle generation respecting the best practices that my company uses?

- A. No, every repository needs as mandatory a related separated master repository.
- B. No, unless I also have live data environments because it is mandatory that the production work repository is installed on the data production server, the test work repository on the test data server and so on.
- C. Yes, it is possible to create separate metadata environments with work repositories, that define for instance, a current level of development work repository, next level development, maintenance, production, and so on.
- D. Yes, but also install a mandatory agent for every work repository and compile all its Java archives separately.

Correct Answer: C

QUESTION 4

Select the two correct statements about the Date Profiler.

- A. It can profile string dates written in a variety of formats, such as DD/MM/YYYY or MM/DD/YYYY.
- B. It provides a distribution for the day in the year, such as February 21, regardless of the year.
- C. It allows the EDQ user to define a valid range of dates.
- D. By clicking a date in blue, the user can drill down to the records that carried that value.
- E. It rejects February 29 as an invalid date.

Correct Answer: BD

QUESTION 5

You want to add a new CDC subscriber in ODI after you have started the Journal process, what steps do you need to go through in order to use this new subscriber?

- A. Drop Journal, remove existing subscribers, add a new subscriber, start Journal, and edit the default Journalizing filter in your Interfaces
- B. Drop Journal, add a new subscriber, start Journal, and remove the default Journalizing filter in your Interfaces
- C. Drop Journal, add a new subscriber, start Journal, and edit the default Journalizing filter in your Interfaces
- D. Add a new subscriber and edit the default Journalizing filter in your Interfaces

Correct Answer: D

You can add subscribers after starting the journals. Subscribers added after journal startup will only retrieve changes captured since they were added to the subscribers list.
