**QUESTION 1**

Company ABC wants to deploy workplan task structures where the lowest tasks represent deliverables. They want to collect costs at a level higher than the lowest tasks for groups of deliverables. Which two task structure relationships are available for them to consider?

- A. Define the structures as Fully Shared.
- B. Utilize Task-based mapping structures.
- C. Define a separate branch of task hierarchy for deliverables.
- D. Define a separate branch of task hierarchy for cost collection.
- E. Define the structures as Partially shared.

Correct Answer: BC

Note:

*You can set up two types of project structures in Oracle Projects:

/Workplan structures consist of tasks that help project managers and team members plan, track, and deliver projects on time.

/Financial structures consist of tasks that help project managers and financial administrators track billing, costs, budgets, and other financial information for individual projects.

*If you enable both a workplan structure and a financial structure for your project or project template, you can decide whether or not they are integrated, and if so, to what degree. You do this by choosing one of the following options on the

Structures setup page:

/Shared Structures: Enables you to generate a financial structure with a task hierarchy that is fully shared by the workplan structure task hierarchy. Workplan and financial structures are fully shared by default.

/Partially Shared Structures: Enables you to generate a financial structure that is partially shared by the workplan structure hierarchy.

/Non-Shared: Task-Based Mapping: Enables you to map individual workplan structure tasks to individual financial structure tasks.

/Non-Shared: No Mapping: Choose this if you do not want to integrate your project workplan and financial structures in any way.

QUESTION 2

Which three options would result in a billing event being excluded from an invoice?

- A. No task is assigned to the event.
- B. No event date has been entered.

- C. The event date is later than the invoice date when the process for draft invoice generation is submitted.
- D. The event has been placed on hold.
- E. No revenue amount has been entered on the event.

Correct Answer: BCE

Note:

*Events: To be included on an invoice, an event must meet the following criteria:

/Event must not be already invoiced

/ (C) Event completion date must be on or before the bill through date

/Event must be revenue distributed (for write-on revenue events only)

/If the Date-Effective Funds Consumption option is selected, then the event date must be within the agreement start and expiration dates

*Billing Events: Billing events are events for which there is no associated revenue. Because billing events have not accrued revenue against an agreement, a billing event can be billed against any agreement that has sufficient funding to

cover the entire amount of the event (unless an agreement was specified on the event).

QUESTION 3

Identify three transactions that can be entered as a pre-approved expenditure batch:

- A. Burden
- B. Supplier Invoices
- C. Usages
- D. Expense Reports
- E. Miscellaneous

Correct Answer: ADE

Pre-approved expenditures are timecards, expense reports(D), usage logs, miscellaneous transactions(E), burden transactions(A), inventory transactions, and work in process transactions usually completed on paper and approved by a supervisor. You enter pre-approved expenditures into Oracle Projects in batch mode, generally on a weekly basis. After you enter the batches into the system, you submit them for review and then release them for cost distribution.

QUESTION 4

A project has been mistakenly set up as a capital project, instead of a contract project. The project has already incurred expenditure. How can this be remedied?

- A. Change the project type to Contract
- B. Leave the project as capital and accrue for revenue as is.
- C. Move all the costs to a contract task within the capital project.
- D. A new project should be set up and costs transferred.
- E. Delete all the expenditure items and change the project type.

Correct Answer: D

Note: *Project Type

The project type determines how Oracle Projects processes costs (expenditure items) for a project. The type you choose provides many defaults and controls for project entry and processing. You must choose a type from one of the following project type classes:

/Use an Indirect project type to collect and track expenditure item costs and labor hours for overhead activities, such as administrative and overhead work, marketing, and bid and proposal preparation. You can also define indirect projects to track time off including sick leave, vacation, and holidays

/Use a Capital project type to collect and track costs and labor hours for asset development activities which you plan to capitalize as one or more assets.

/Use a Contract project type to collect and track costs, labor hours, revenue, and billing for services performed for and reimbursed by a client

QUESTION 5

Identify the four different levels where transaction controls are defined.

- A. Expenditure Categories
- B. Expenditure Organization
- C. Employee
- D. Project Organization
- E. Expenditure Type
- F. Person Type

Correct Answer: ACDE

You can configure transaction controls by the following:

(A) Expenditure Category (C) Employee (E) Expenditure Type Non-Labor Resource
