**QUESTION 1**

When deploying a new Update Package to a development workstation that includes multiple objects (including applications, UBEs, and business functions), which statement best describes what happens to local objects during a package deployment?

- A. Saved off to a backup location in zip format
- B. Automatically checked into the deployment server
- C. Completely replaced by the new updated objects in the package
- D. Merged with the new updated objects in the package
- E. Saved to the Save location as defined in OMW

Correct Answer: B

QUESTION 2

After a full package has been built and is deployed on the same Enterprise Server, where do the runtime business function libraries get copied from?

- A. The \bin32 directory on the deployment server
- B. The \\bin32 directory on the deployment server
- C. The \bin32 directory on the build machine
- D. The \bin32 directory on the enterprise server
- E. The \\bin32 directory on the enterprise server

Correct Answer: D

QUESTION 3

EnterpriseOne Object Management Workbench is the centralized change management facility for maintaining EnterpriseOne objects in the system. All users will have a Default Project in OMW Which is NOT true about the Default Project in OMW?

- A. Can be used to research, develop, and prototype objects
- B. Interactive and Report versions that are created external to OMW will automatically be added to the Default Project
- C. Modified/created Data Dictionary and UDC items will automatically be added to the Default Project
- D. Project can advance status
- E. Owners can belong in multiple roles

Correct Answer: D

QUESTION 4

Which step is NOT a valid Workbench process?

- A. Environment Workbench
- B. Package Workbench
- C. Control Table Workbench
- D. Machine Workbench
- E. Portal Workbench

Correct Answer: D

QUESTION 5

From time to time, EnterpriseOne software updates are released in Electronic Software Update (ESU) format to correct software issues. In order to maintain proper change control over potentially affected objects, what are the two recommended actions that could be performed prior to applying the ESU to an existing environment?

- A. Run the downloaded executable and then run the impact analysis tool through the EnterpriseOne Software Updates application
- B. Run the downloaded executable and then evaluate the changed objects individually through Change Assistant
- C. Run the downloaded executable and then run the compare UBE R96IMPANL
- D. Download and evaluate through Configuration Assistant
- E. Download and evaluate through Change Assistant and the impact analysis tool

Correct Answer: BE
