QUESTION 1

Which two statements best describe an Exalogic configured environment? (Choose Two)

A. Each compute node uses NFS to access the Sun ZFS storage.

B. The ZFS shared storage appliance is used to host only application log files. Other binaries and data are stored locally on the compute nodes.

C. The Sun ZFS storage houses all application binaries, log files, and other required data. Only the operating system is stored locally on compute node storage.

D. In the reference topology, the Sun ZFS storage appliance spare storage head is used to run the domain administrative server.

Correct Answer: AC

QUESTION 2

Which two statements are true about the Exalogic X2-2 model?

A. Exalogic hardware is pre-assembled and delivered in standard 19" 42U rack configuration.

B. Ethernet connects individual Exalogic internal components as well as connecting externally to additional Exalogic or Exadata racks.

C. The operating system is pre-installed at the factory.

D. Each compute node contains a dual processor with 8 cores.

E. Each compute node utilizes a single solid-state disk to host the operating system images and to act as high-performance swap and storage.

Correct Answer: AC

QUESTION 3

In which scenario would you configure a set of floating IP addresses using the BOND1 interface for WebLogic managed servers and administration server?

A. When HTTP traffic comes from the external data center

B. For the private InfiniBand fabric network traffic used by the WebLogic Server instances and coherence servers

C. For WebLogic Server replication traffic

D. When database traffic needs to be isolated on a separate virtual LAN

Correct Answer: A

QUESTION 4

What is true about OneCommand or Exalogic Configuration Utility?

A. It is used at the customer site to install the initial Exalogic Base Image.

B. It utilizes an interview-style technique to collect site-specific information into spreadsheet form.

C. It is a tool and a collection of scripts that are included as part of the Exalogic Base Image.

D. It is tooling that is primarily used to support Exalogic configuration at the factory.

Correct Answer: BC

OneCommand is a tool and a collection of scripts that are included as part of the Exalogic Base Image and it utilizes an interview-style technique to collect site-specific information into spreadsheet form.

QUESTION 5

Which two are correct about Node Manager configuration?

A. Modify and use the original Node Manager configuration and local files located in the middleware home directory.

B. Copy the original Node Manager configuration and log files to a new directory outside of middleware home. Then, modify properties as necessary.

C. There is no need to modify the default configuration.

D. The Node Manager instance running on an Exalogic compute node listens on the BOND0/private address of the compute node.

Correct Answer: BD
