QUESTION 3

Which two hardware requirements exist for an HA-enabled server pool with Live Migration?

- A. Each server in the pool must have the exact same model of processor.
- B. Each server in the pool must have the same amount of memory.
- C. Each server in the pool must have similar processors, specifically vendor, family and steppings.
- D. Each server in the pool must be connected to shared storage.
- E. Each server in the pool must be large enough to support the largest virtual machine in the pool

Correct Answer: CD

**QUESTION 4**

There is an issue booting into a virtual machine. The log files show that there is an issue during the Linux boot process of the guest. What two methods will best help determine the problem?

- A. Use xm console to attach to the guest while it is booting and look for the specific error.
- B. Run xm dmesg to see hardware errors in the guest.
- C. Run xm info to see the list of devices being attached to the virtual machine.
- D. xm block-attach the disk to another virtual machine to inspect the file system and check module loading issues.

Correct Answer: AB

QUESTION 5

In a paravirtualized environment, which answer best describes the drivers that are used in dom0 and the guest to communicate block I/O requests?

- A. A blkback driver is used in dom0, and a blkfront driver is used in the guest.
- B. A native device driver is used in dom0, and a blkback driver is used in the guest.
- C. A blkfront driver is used in dom0, and a native device driver is used in the guest.
- D. A blkfront driver is used in dom0, and a blkback driver is used in the guest.
- E. Native drivers are used in both dom0 and the guest.

Correct Answer: A
