**QUESTION 1**

When setting up a server pool, enabling what option will persist the IP address of a server pool master after an HA failover?

- A. High Availability Mode
- B. Server Pool Virtual IP
- C. Live Migration
- D. O2CB service
- E. OCFS service

Correct Answer: C

QUESTION 2

Which three attributes of an existing virtual disk can be changed using Oracle VM Manager?

- A. Virtual Disk N
- B. Virtual Disk Size
- C. Hard Drive Type
- D. QoS Enabled
- E. Priority Class

Correct Answer: CDE

QUESTION 3

What is the effect of running a server pool restores?

- A. When you restore a server pool, all the data stored in the Oracle VM Manager database is deleted, and the data in the server pool master and virtual machine servers is used to restock the database.
- B. When you restore a server pool, all servers are removed from the pool, and the data in the database is removed, restoring the server pool to its initial state.
- C. When you restore a server pool, all the data stored in the server pool master will be deleted, and will be synchronized with the latest information from the Oracle VM Manager database. The server pool master is responsible for updating the individual Oracle VM servers' agent databases.

D. When you restore a server pool, a signal is sent out to each server in the pool, which responds with the current state of all of the virtual machines it hosts. This data is used to restore the data in the Oracle VM database.

Correct Answer: C

QUESTION 4

In Oracle 2.2.x under which directory does each repository create a mount point and what is the name of subdirectory?

- A. Each repository will create mount point under /OVS, with a directory named using the UUID of the respiratory.
- B. Each repository will create a mount point under /var/ovs, In a directory named using the UUID ofthe repository.
- C. Each repository will create a mount point under /var/ovs/mount, in a directory named using theUUID of the repository.
- D. Each repository will create a mount point under /OVS, with a directory named using a sequencenumber starting at 0.
- E. Each repository will create a mount point under /var/ovs, with a directory named using a sequence number starting at 0.
- F. Each repository will create a mount point under /var/ovs/mount, with a directory named using a sequence number starting at 0.

Correct Answer: C
