QUESTION 1

This exhibit displays your test for the new Student Suggestions page, which has a design error.

The screenshot shows a web form titled "Student Suggestions". At the top, there is a search bar with the text "*Student ID" followed by a text input containing "2001" and a search icon. To the right of the search bar, the text "Larsen, Mark D" is displayed. Below the search bar is a section titled "Suggestion Details" with a "Find" button and "View all" text. To the right of this section are navigation buttons: "First", "1 of 1", and "Last". The form contains several input fields: "Number" (text input), "Suggestion Category" (dropdown menu with "Other" selected), "Course Code" (text input with a search icon), "Instructor" (text input with a search icon), "Suggestion Award" (dropdown menu with "PeopleSoft T-Shirt" selected), and "Description" (text area). There is also a "Size" section with a title "Size" and four radio buttons labeled "Small", "Medium", "Large", and "Extra Large". At the bottom of the form are five buttons: "Save", "Return to Search", "Previous in List", "Next in List", and "Notify".

How should you fix this page?

- A. In the page definition, make Student ID a display control field
- B. In the record definition, make Student ID an alternate search key
- C. In the page definition, make Student ID display-only
- D. In the component definition, select the correct search record
- E. In the record definition, make Student ID the high-level key

Correct Answer: C

QUESTION 2

Which three statements are true regarding PeopleCert user-defined variables? (Select three.)

- A. Explicitly declaring object type variables provides no benefit over allowing them to be auto-declared
- B. All local variables must be declared at the beginning of the program

- C. Local variables can be declared and instantiated in a single statement
- D. All component variables must be declared before the first line of executable code
- E. Local variables can be declared and assigned in a single statement
- F. All variables of type Any must be explicitly declared

Correct Answer: D

QUESTION 3

The following PeopleCode program compares two editable fields on a component.

```
If All (PSU_CRS_SESSN.START_DATE, PSU_CRS_SESSN.END_DATE) And
    PSU_CRS_SESSN.START_DATE > PSU_SESSN.END_DATE Then
    Error MsgGet(1040, 3, "Message Not Found: Course Start Date must not be later than End Date.",
End-If;
```

On which event or events should the program be placed?

- A. FieldEdit and RowInit
- B. SaveEdit and SavePreChange
- C. SaveEdit
- D. FieldChange and SavePreChange
- E. SaveEdit and RowInit
- F. FieldEdit

Correct Answer: B
