QUESTION 1

Robin develops many apps in his workspace that use various APEX plug-ins. Some apps use the same plug-in as other apps. When a newer version of a plug-in is available, Robin has to update the plug-in in multiple apps.

How can Robin upgrade a plug-in once and have all other apps that use the same plug-in get updated at the same time?

A. Run a SQL command to update the plug-in definition in each application.

B. Write a PL/SQL package that he can reuse to update the plug-in definitions in each application.

C. Update one of the plug-ins, and then click Push Update to update the other apps.

D. Create a "Plug-ins Master" app where he stores all plug-ins and then subscribes the plug-ins in all of his other apps to the plug-ins in the "Plug-ins Master" app.

Correct Answer: B

QUESTION 2

Which is true interactive reports?

A. Subscription is supported only on primary reports

B. A developer can hide the search bar

C. A developer can delete a primary report D. Only reports can be downloaded, not group by, charts, or pivots

Correct Answer: B

QUESTION 4

What is the least error-prone way to split a long list into two lists?

A. Create an empty second list, copy selected list items from the first list to the second list, and then remove the copied list items from the first list.

B. Create two new lists, copy list items from the initial list to the first list, copy the remaining list items from the initial list to the second list, and then delete the initial list.

C. Create an empty second list, manually re-create the needed list entries, and then remove the matching list entries from the first list.

D. Copy the entire list, grid edit the copied list and remove entries that are not needed, and then grid edit the first list and remove the entries that are now in the second list.

Correct Answer: C

QUESTION 5

Robert has a form page, Page 5, on the EMP table. He has defined two validations.

1.

Validation 1 checks that P5_MGR is not null.

2.

Validation 2 checks that the employee selected in P5_MGR has a job of PRESIDENT or MANAGER.

How can Robert prevent the employee job validation (Validation 2) from firing when the P5_MGR is NOT NULL validation (Validation 1) has failed?

A. Set stop processing to Yes for the P5_MGR is NOT NULL validation (Validation 1)

B. Ensure Validation 1 is listed before Validation 2

C. Add a server-side condition of P5_MGR is NOT NULL to the employee job validation (Validation 2)

D. Set Always Execute to No for the P5_MGR employee job validation (Validation 2)

Correct Answer: C
