QUESTION 1

Which two are objectives of the Abstract Factory pattern?

A. To create whole-part hierarchies

B. To create families of related objects

C. To enforce dependencies between concrete classes

D. To specify the types of objects to create by using a sample instance

E. To separate the construction of a complex object from its representation 100% Real QandAs | 100% Real Pass

Correct Answer: BC

QUESTION 2

Upper management has announced a change in a company\\\'s primary hardware supplier for the next year, the timing of this change coincides with key purchases that line of business department has to make in support of its Java EE application upgrade/redesign project.

You are asked to help outline a strategy to preserve the project timeline and keep hardware training costs contained.

Which recommendation will you make?

A. Add new hardware to create a heterogeneous environment.

B. Request another year of sales and support with the existing vendor.

C. Request more time to consider the total cost of change to your project and to modify your budget.

D. Use new hardware on the web tier and redeploy existing hardware to the other tiers.

Correct Answer: A

QUESTION 3

You are the architect of a web application that uses javaServer Faces (JSF) as a presentation tier for business processes coded as stateless session beans. When you add new code to the stateless session

100% Real QandAs | 100% Real Pass

beans to address new accounting requirements, without changing the interface, you discover that the new business processes are being ignored by some of the JSF components.

What might be the cause of this problem?

A. The presentation tier is relying on validation logic in the business tier.

B. The browser is caching out-of-date versions of the JSF components.

C. The business processes are not rigorously encapsulated in the session beans.

D. The new session beans have been deployed incorrectly, and proper deployment will resolve the problem.

Correct Answer: C

QUESTION 4

While analyzing an application, you observe that it contains numerous Interfaces for complex domain logic. Completing a business Function currently requires calling several of these interfaces in an order that is understood by system experts.

Which design pattern would you suggest to refactor the code?

A. MVC

B. DAO

C. Adapter

D. Decorator

Correct Answer: A

QUESTION 5

Which two types of applications benefit from using JavaServer Faces (JSF)?

A. An application with a customizable UI skin

B. An application that implements access control on each action based on user role.

C. An application in which type conversion of the values of UI components is implemented only in Java classes.

D. An application that sets specific database validation listeners on a UI component

Correct Answer: CD
