**QUESTION 1**

A company must honor a service-level agreement (SLA) for its application, which states all database requests must execute within three seconds.

100% Real QandAs | 100% Real Pass

Users complain that some requests take longer than five seconds to complete. You have been contracted to fix the problem.

Which course of action do you recommend?

- A. Modify the program to implement multi threading and an event-driven design.
- B. Add servers to distribute the load.
- C. Upgrade the application server and the operating system.
- D. Define a plan for isolating the bottleneck, and define indicators that will measure performance under a test load.

Correct Answer: D

QUESTION 2

Which two functions are essential parts of a service oriented architecture (SOA) infrastructure?

- A. The service provider, which executes business logic in a stateless fashion
- B. The service consumer, which accesses services from the service repository
- C. The service repository, which stores software component metadata
- D. The service broker, which delivers well-defined service-level agreements
- E. The service look-up facility, which provides a central resource for naming and access

Correct Answer: AC

QUESTION 3

Which two statements are true about RESTful web services?

- A. They can be both stateful and stateless.
- B. They support the use of AJAX in web applications.
- C. They are often similar than their Simple Object Access protocol (SOAP) equivalents.
- D. They are independent of the transport protocol.
- E. They support Remote Procedure Call (RPC) and message-Oriented Middleware (MOM) integration styles.

Correct Answer: BC

QUESTION 4

You have been recruited by an online retailer of footwear to conduct a review of their online systems. Your primary Finding is that the development team has implemented duplicated complex business logic as Java scripts directly into the JSPs, causing performance, scalability, and maintainability issues.

Which two design patterns would you select to improve the current code base?

- A. View Helper
- B. From Controller
- C. Composite View
- D. Service-to-Worker
- E. Business Delegate

Correct Answer: BD

QUESTION 5

Which three web applications work best when they are designed to be server-push enabled?

- A. A news feed used for providing users with frequently updated news content
- B. A web chat that allows users to communicate using easily accessible web interfaces
- C. A live sporting event application, used to deliver current results during matches
- D. An auction system that provides users with live online bidding
- E. A graphics rendering application that generates visuals in an orderly fashion

Correct Answer: BCD
