- B. 2015-04-27
- C. 2015-02-27
- D. Compilation fails due to error at line 6.
- E. Compilation fails due to error at line 8.

Correct Answer: A

To create we have used following method with LocalDate class; public static LocalDate of(int year, int month, int dayOfMonth) Here we need to remember that month is not zero based so if you pass 1 for month, then month will be January. Then we have used period object of 1 day and add to date object which makes current date to next day, so final output is 2015-03-27. Hence option A is correct. <https://docs.oracle.com/javase/tutorial/datetime/iso/datetime.html>
