**QUESTION 1**

A developer wants a web application to be notified when the application is about to be shut down. Which two actions are necessary to accomplish this goal? (Choose two.)

- A. include a listener directive in a JSP page
- B. configure a listener in the TLD file using the element
- C. include a element in the web application deployment descriptor
- D. configure a listener in the application deployment descriptor, using the element
- E. include a class implementing ServletContextListener as part of the web application deployment
- F. include a class implementing ContextDestroyedListener as part of the web application deployment
- G. include a class implementing HttpSessionAttributeListener as part of the web application deployment

Correct Answer: DE

QUESTION 2

What is true about Java EE authentication mechanisms?

- A. If your deployment descriptor correctly declares an authentication type of CLIENT_CERT, your users must have a certificate from an official source before they can use your application.
- B. If your deployment descriptor correctly declares an authentication type of BASIC, the container automatically requests a user name and password whenever a user starts a new session.
- C. If you want your web application to support the widest possible array of browsers, and you want to perform authentication, the best choice of Java EE authentication mechanisms is DIGEST.
- D. To use Java EE FORM authentication, you must declare two HTML files in your deployment descriptor, and you must use a predefined action in the HTML file that handles your user's login.

Correct Answer: D

QUESTION 3

Which security mechanism uses the concept of a realm?

- A. authorization
- B. data integrity
- C. confidentiality
- D. authentication

Correct Answer: D

QUESTION 4

A web application allows the HTML title banner to be set using a servlet context initialization parameter called titleStr. Which two properly set the title in this scenario? (Choose two.)

- A. `${titleStr}`
- B. `${initParam.titleStr}`
- C. `${params[0].titleStr}`
- D. `${paramValues.titleStr}`
- E. `${initParam['titleStr']}`
- F. `${servletParams.titleStr}`
- G. `${request.get("titleStr")}`

Correct Answer: BE

QUESTION 5

You have created a web application that you license to real estate brokers. The webapp is highly customizable including the email address of the broker, which is placed on the footer of each page. This is configured as a context parameter in the deployment descriptor:

10.

11.

footerEmail

12.

joe@estates-r-us.biz

13.

Which EL code snippet will insert this context parameter into the footer?

- A. [Contact me](#)
- B. [Contact me](#)
- C. [Contact me](#)

D. [Contact me](#)

E. [Contact me](#)

Correct Answer: C
