QUESTION 1

Given:

39.

```
Image image = Image.createImage(20, 20);
```

40.

```
Graphics g = image.getGraphics();
```

41.

```
g.setColor(0xFF0000); //RED
```

42.

```
g.fillRect(0, 0,
```

43.

```
20, 20);
```

44.

```
Alert alert= new Alert("WARNING!");
```

45.

```
alert.setImage(image);
```

46.

```
g.setColor(0x000000); //BLACK
```

47.

```
g.fillRect(0, 0,
```

48.

```
20, 20);
```

What is the result when the Alert is shown?

- A. A runtime exception is thrown.
- B. A red square is shown on the Alert.
- C. Either a red square or a black square is shown depending on the implementation.
- D. A black square is shown on the Alert.

Correct Answer: B

QUESTION 2

Which is true about the process of updating a MIDlet suite in a JTWI-compliant device?

- A. An unsigned MIDlet suite must NOT be allowed to update a signed MIDlet suite.
- B. A MIDlet suite CANNOT be updated with the same MIDlet suite from a different URL.
- C. The RMS record stores of the updated MIDlet suite are always lost.
- D. A MIDlet suite CANNOT be updated with another MIDlet suite that has a lower value for the MIDlet-Version attribute.

Correct Answer: A

QUESTION 3

When using X.509 PKI, where must a MIDlet suite's security certificates be placed?

- A. inlined in the JAR manifest, using a base64 encoding
- B. in .cer files in the JAR's META-INF directory
- C. inlined in the JAD, using a base64 encoding
- D. in a user-defined subclass of SecurityInfo in the JAR's META-INF directory

Correct Answer: C

QUESTION 4

Which is true when using multiple threads to access a record store?

- A. You must coordinate access to a record store to prevent data corruption.
- B. The implementation coordinates access, ensuring that record stores will NOT be corrupted.
- C. You CANNOT access a record store with multiple threads.
- D. You must lock a record store prior to access.

Correct Answer: A

QUESTION 5

Which statement is true about TiledLayer and Sprite objects maintained by a LayerManager object?

- A. Either Sprite or TiledLayer objects may be inserted at a unique position in the LayerManager.
- B. TiledLayer objects are always added as the background layer.

C. Once either Sprite or TiledLayer objects are added, the order can be changed only by creating and adding to a new LayerManager.

D. Sprite objects are always added as the background layer.

Correct Answer: A
