**QUESTION 1**

The /etc/user_attr file on your system contains the following entry:

```
operator::::type=role;auths=solaris.system.shutdown,Solaris.admin.patchmgr;profiles=Log Management
```

Which two are correct statements about this entry? (Choose two.)

- A. The account operator is assigned one right.
- B. The account operator is assigned two rights.
- C. The account operator is a regular user account.
- D. The account operator is assigned two authorizations.
- E. The account operator is assigned the default system role.

Correct Answer: AD

QUESTION 2

Which statement is true about the following excerpt from the /etc/system file? * Begin MDD root info (do not edit)
rootdev:/pseudo/md@0:0,10,blk * End MDD root info (do not edit)

- A. The system's host name is rootdev.
- B. The root (/) file system is a metadvice.
- C. The excerpt comes from a diskless client.
- D. It is the result of initiating a metainit command on the root (/) file system.

Correct Answer: B

QUESTION 3

Given the add_install_client script executed with the options:

```
# ./add_install_client -d -b "input-device=ttya" -b "output-device=ttya" SUNW.i86pc i86pc
```

Which two statements are true? (Choose two.)

- A. The console is directed to a serial port.
- B. The console is directed to the video port.
- C. This applies to all x86-based systems being network installed using PXE.

- D. This applies only to the system with a host name of SUNW.i86pc being network installed using PXE.
- E. The system to be installed using PXE must be booted using a diskette before it accesses the network.

Correct Answer: AC

QUESTION 4

Given:

```
# metadb; metastat -c flags first blk block count a u 16 8192 /dev/dsk/c1t0d0s3 a u 16 8192 /dev/dsk/c1t1d0s6 a u 8208

```

Which three statements are true about this configuration? (Choose three.)

- A. The d10 metadvice is currently out of date.
- B. The d11 metadvice is currently out of date.
- C. The d12 metadvice is currently out of date.
- D. The d100 metadvice is configured as a three-way RAID-1 mirror volume.
- E. The d100 metadvice is configured as a three-way RAID-0 striped volume.
- F. The d100 metadvice is configured as a seven-way RAID-1 mirror volume.
- G. The d100 metadvice is configured as a seven-way RAID-0 striped volume.

Correct Answer: BCD

QUESTION 5

You are extending the NIS support in your network to include a new NIS map to support automount direct maps. As part of this process, you modify the NIS Makefile to include the following line:

```
touch auto.direct.time; \\\
```

What is the purpose of this line?

- A. The line updates the timestamp in the index file for the NIS map so that the data file and the index file are correctly synchronized.
- B. The line is used to create the auto.direct.time source file for the NIS map in situations where the source file does not

already exist.

C. The line updates the timestamp on the `/var/yp/auto.direct.time` file so that the system has a record of when the map was last built.

D. The line creates the `/etc/auto.direct.time` file, which causes a message to be sent to the `syslogd` daemon indicating that the NIS map has been changed.

Correct Answer: C
