### QUESTION 1

Which two are valid reasons to disable automatic quorum configuration? (Choose two.)

- A. To configure a two-node cluster.
- B. To use a NAS device as a quorum device.
- C. To automatically reset the installmode flag.
- D. To use the quorum server as a quorum device.
- E. To have several dual-ported disks or LUNs configured.

Correct Answer: BD

---

### QUESTION 2

You have a two-node cluster with nodes mars and venus. Given the following output: # hostname mars #vxdg list NAMESTATEID rootdgenabled1 152724944.22. mars nfsdgenabled1 152725899.26.venus Note the ID of disk group nfsdg. Which statement is correct?

- A. The ID of nfsdg looks incorrect. You should contact Sun support for further investigation.
- B. Disk group nfsdg was previously imported by node venus and now is imported on node mars. The ID just reports the history
- C. Disk group nfsdg is currently imported on node mars. The ID just reflects the node where the disk group was initially created. There is no problem.
- D. Disk group nfsdg seems to have a problem, since it is reported to be imported on node mars, but still carries an ID from venus. So you might have to suspect data corruption.

Correct Answer: C

---

### QUESTION 3

What functionality does the global device implementation provide?

- A. A failed device will be transparently replaced by a spare.
- B. .All nodes on the public network can access the cluster storage.
- C. Storage connected to any cluster node is available to all cluster nodes using standard device semantics.
- D. Only cluster nodes that are physically connected to a storage device can directly access that device simultaneously.

Correct Answer: C

---

#### QUESTION 4

Which is important when installing Sun Cluster with Solaris Volume Manager to manage the boot disks?

- A. The /global/.devices/node@1, /global/.devices/node@2 should have unique volume names for each node in the cluster.
- B. All volume names should be configured to be the same across all cluster nodes.
- C. The /global/.devices/node@1, /global/.devices/node@2 should be configured on a soft partition.
- D. The disk partition 7 on the boot disk should be configured to be 6 Mbytes for the metadbs.

Correct Answer: A

---

#### QUESTION 5

When you design the network redundancy for a cluster node, you have to understand the key requirements of IPMP. Which statement is incorrect?

- A. Every adapter must have a unique local MAC address.
- B. A network adapter can be a member of only one group.
- C. Solaris 9 requires test addresses for every IPMP group with more than one adapter.
- D. Solaris 10 must have test addresses configured in an IPMP group with more than one adapter.

Correct Answer: D
