QUESTION 1

The MySQL installation includes the mysql_config_editor utility for managing login paths stored in a .mylogin.cnf file.

Which two are true about the login path feature? (Choose two.)

A. mysql_config_editor is the only MySQL-provided utility that can print the values stored in .mylogin.cnf.

B. A .mylogin.cnf file can store at most one login path.

C. It provides a FIPS-compliant keyring for storing MySQL login details.

D. A .mylogin.cnf file can be edited using a text editor, such as vim or Notepad++.

E. It is an alternative to storing the MySQL login details in a my.cnf file.

F. It provides means to help avoid accidentally exposing the MySQL login details.

Correct Answer: EF

QUESTION 2

Consider the two partial outputs of the SHOW GLOBAL VARIABLES command from a master and slave

server:

Master:

Variable name	Value
connect_timeout	5
log_bin	ON
max_connections	100
shared_memory_base_name	MYSQL
server_id	2
tmp_table_size	5242880
version	5.7.20

Slave: There is a problem with the slave replicating from the master. Which statement describes the cause of the problem?

```
+-------------------------------------+------------------------------------------------+
| Variable name                       | Value                                          |
+-------------------------------------+------------------------------------------------+
| connect_timeout                     | 5                                              |
| log_bin                             | OFF                                            |
| max_connections                     | 10                                             |
| shared_memory_base_name             | MYSQL5                                         |
| server_id                           | 2                                              |
| tmp_table_size                      | 4266336                                        |
| version                             | 5.7.22                                         |
```

A. The log_bin variable is set to OFF on the slave.

B. server_id is not unique.

C. The max_connections variable on the slave needs to be increased.

D. The shared_memory_base_name variable must match the master.

E. The version of the slave is newer that the version of the master.

Correct Answer: A

QUESTION 3

You have installed MySQL on Oracle Linux 7 using the official RPM distribution, and SELinux is set to "permissive".

Examine this extract of the my.cnf file:

```
[mysql]
port=3301

[mysqld]
port=3302

[mysqld@replica]
port=3303

[replica]
port=3304
```

You issue this command to start MySQL Server:

systemctl start mysqld@replica

On which port is the server listening?

A. 3301

B. 3303

C. 3302

D. 3304

Correct Answer: A

QUESTION 4

SQL injection is a common security threat.

Which two methods would help protect against this risk?

A. using stored procedures to validate values that are input

B. using SQL variables to secure input values

C. using prepared statements to handle unsecured values

D. installing the SQL Protection plugin to catch such attempts

E. starting the server with the ?injection-protection command-line option.

Correct Answer: AB
