⚙ **800,000+** Satisfied Customers

QUESTION 1

Given this class:

```
@Path("/res")
class Resource {
    @POST void doPost() { ... }
    @GET void doGet();
}
```

Choose the statement that best describes the potential to write a client implemented using JAX- WS to interact with the JAX-RS (restful) web service defined by this class (Choose one):

A. It is impossible, since JAX-WS requires that the underlying interaction be SOAP-based, and JAX-RS does not support SOAP.

B. It is impossible, since JAX-RS does not support the same extension mechanism via JAX-WS Handlers that JAX-WS supports.

C. It is possible, since the JAX-WS API can be used to create a client that uses a simple raw XML protocol to interact with a service at a given URL.

D. It is possible, since a JAX-WS proxy Port type can be generated to use a simple raw XML protocol to interact with a service at a specific fixed URL.

Correct Answer: C

QUESTION 2

Which of the following is NOT a correct way of configuring handlers on a Web Service client ? (Choose one)

A. Specify the handlers in jaxws-catalog.xml and make it available in the classpath of the client

B. Create a handlerchain as list of handlers and call setHandlerChain() with that list on the Binding object.

C. Programmatically configure the handlers by setting a custom HandlerResolver on the service instance and create proxies from that service.

D. Specify handlers in handler chain configuration XML file and add @HandlerChain referencing handler configuration file to the Web Service references for clients running in JavaEE Container.

Correct Answer: A

QUESTION 3

Which two statements are true about creating a Web service with JAX-WS? (Choose two.)

A. Stateless Web services must be created with HTTP servlet endpoints.

B. Creating the portable artifacts by hand is slow, but makes a service easier to maintain.

C. All Java-based endpoints share a common packaging model.

D. EJBs can serve as endpoints if hosted in a container with runtime and service support.

E. JAX-WS supports creating services from source and compiled code without a WSDL.

Correct Answer: DE

QUESTION 4

In which order do LogicalHandlers and SOAPHandlers configured on a Web Service endpoint execute on an incoming message ? (Choose one)

A. SOAPHandlers in the order specified in configuration are executed first and later the LogicalHandlers specified in the order get executed

B. LogicalHandlers in the order specified in configuration are executed first and later the SOAPHandlers specified in the order get executed

C. All the handlers are executed in the order specified in the configuration

D. All the handlers are executed in the reverse order specified in the configuration.

Correct Answer: A

QUESTION 5

Which of the following WS-Security token profiles is not supported in Metro?

A. X509 Token Profile

B. Kerberos Token Profile

C. SAML Token Profile

D. SOAP with Attachments (SWA) profile

E. Right Expression Language (REL) Token Profile

Correct Answer: E
