QUESTION 1

Which statement is NOT correct when setting up compartment quotas?

- A. There are three types of quota policy statements which are set, unset and zero.
- B. Compartment quotas use policies that allow allocation of resources with a high level of flexibility.
- C. Along with compartment budgets, compartment quotas create a powerful toolset to manage your spending.
- D. Compartment quotas are set by Oracle.

Correct Answer: D

<https://docs.oracle.com/enus/iaas/Content/General/Concepts/resourcequotas.htm>

Compartment Quotas

This topic describes compartment quotas for Oracle Cloud Infrastructure.

Compartment quotas give tenant and compartment administrators better control over how resources are consumed in Oracle Cloud Infrastructure, enabling administrators to easily allocate resources to compartments using the Console. Along with [compartment budgets](#), compartment quotas create a powerful toolset to manage your spending in Oracle Cloud Infrastructure tenancies.

You can start using compartment quotas from any compartment detail page in the Console.

About Compartment Quotas

Compartment quotas are similar to [Service Limits](#). The biggest difference is that service limits are set by Oracle, and compartment quotas are set by administrators, using policies that allow them to allocate resources with a high level of flexibility.

Compartment quotas are set using *policy statements* written in a simple declarative language that is similar to the IAM policy language.

QUESTION 2

Which statement is true about connecting an OCI compute instance to a Shared Autonomous Database?

- A. The Autonomous Database must be in the same VCN and Subnet as the Compute instance.
- B. The OCI compute instance does not support connecting to a Shared Autonomous Database.
- C. The Autonomous Database must belong to a Network Security Group (NSG).
- D. The OCI compute instance can be used with an Always-Free Autonomous Database account.

E. A Private Endpoint is required to connect to the Shared-Autonomous Database.

Correct Answer: D

QUESTION 3

Which two license types does the customer need to benefit from BYOL when leveraging on-premise Enterprise Database licenses in Oracle Autonomous Database?

- A. Exadata
- B. Active Data Guard
- C. RAC, but only when scaling beyond 16 OCPUs
- D. Transparent Data Encryption
- E. Multitenant

Correct Answer: CE

Refer to <https://www.oracle.com/autonomous-database/autonomous-data-warehouse/pricing/>

If you run Oracle Database Enterprise Edition and the required options listed below, then your BYOL requirements are as follows:

For 1-16 OCPUs of a single Oracle Autonomous Data Warehouse instance:

For each supported Processor license of Oracle Database Enterprise Edition plus Options:

Multitenant, you may activate up to 2 OCPUs of the BYOL Cloud Service. For every 25 supported Named

User Plus licenses of Oracle Database Enterprise Edition plus Options: Multitenant, you may activate 1

OCPU of the BYOL Cloud Service. For 17 OCPUs or more of a single Oracle Autonomous Data

Warehouse:

For each supported Processor license of Oracle Database Enterprise Edition plus Options:

Multitenant and Real Application Clusters, you may activate up to 2 OCPUs of the BYOL Cloud Service.

For every 25 supported Named User Plus licenses of Oracle Database Enterprise Edition plus Options:

Multitenant and Real Application Clusters, you may activate 1 OCPU of the BYOL Cloud Service.

<https://www.oracle.com/database/technologies/datawarehouse-bigdata/adb-faqs.html> "Do customers need

Exadata licenses to benefit from BYOL?"

QUESTION 4

Which statement is true when the Autonomous Database has auto scaling enabled?

- A. Database concurrency is scaled up when needed by the workload.
- B. Increases the number of sessions available to the database.
- C. Scales the PGA and SGA size when needed for the workload.
- D. Enables the database to use up to 3x CPU/IO resources immediately when needed by the workload.

Correct Answer: D

QUESTION 5

Which statement is FALSE about setting up compartment quotas?

- A. Quotas set on a parent compartment override quotas set on child compartments.
- B. Compartment quotas cannot be set on the root compartment.
- C. Compartment quotas use policies that allow allocation of resources with a high level of flexibility.
- D. You cannot manage quotas in a compartment, unless you belong to a group that has the correct permissions.

Correct Answer: B
