QUESTION 1

Which method will NOT permit you to change the database Admin Password of a Autonomous Database on Shared Infrastructure?

A. Admin page of the Cloud Service Console

B. OCI CLI

C. OS command line from the database server.

D. SQLDeveloper

Correct Answer: C

QUESTION 2

While creating a business model what advanced options you can enable or disable? (Choose three)

A. Business Object Security Feature

B. Analytic View Transparency View

C. Autonomous Aggregate Cache

D. Display private tables

E. Analytic View Base Table Query Transformation

Correct Answer: BCE

Creating and Editing Business Models

[<] [>]

From the Business Models page, you can create a business model and view information about it. You can also edit a business model and perform other actions on it.

When you create a business model, you identify a fact table that contains the data to inspect. The Business Model creation tool looks at the contents of that table, identifies any hierarchies in the fact table, and searches for other tables that may contain related hierarchies. It then suggests a business model to which you can make any desired adjustments.

While creating a business model, you can enable or disable the following advanced options:

- Autonomous Aggregate Cache, which uses the dimensional metadata of the business model to manage a cache and can improve query response times.

- Analytic View Transparency Views, which presents analytic views as regular database views and enables you to use your analytic tools of choice while gaining the benefits of analytic views.

- Analytic View Base Table Query Transformation, which enables you to use your existing reports and applications without requiring changes to them.

QUESTION 3

Whenyou are cloning from a backup, what is the earliest timestamp of the backup is allowed in Autonomous Database?

A. 2 hours

B. 30 minutes

C. 1 hours

D. 24 hours

Correct Answer: A

Clone Sources You can use a running database to create a clone. For databases running on shared Exadata infrastructure, you can also use a backup as the source of your clone. When using a backup, you can select a listed backup to clone from, or create a point-in-time clone. Point-in-time clones contain all data up to a specified timestamp. The specified timestamp must be in the past. NoteWhen you create a clone from a backup, you must select a backup that is at least two hours old. https://docs.oracle.com/en-us/iaas/Content/Database/Tasks/adbcloning.htm

QUESTION 4

When using Data Pump to migrate your Oracle database to Autonomous Database, which two objects are imported?

A. Data

B. Schemas

C. Tablespaces

D. Reports

Correct Answer: AB

QUESTION 5

Which three options are supported when migrating to Autonomous Database (ADB)? (Choose three.)

A. RMAN Cross-Platform backup and restore

B. Golden Gate on-premise installation

C. PDB unplug / plug operation

D. Datapump export / import

E. Dataguard Physical Standby

F. Golden Gate Cloud service

Correct Answer: BDF
