**QUESTION 1**

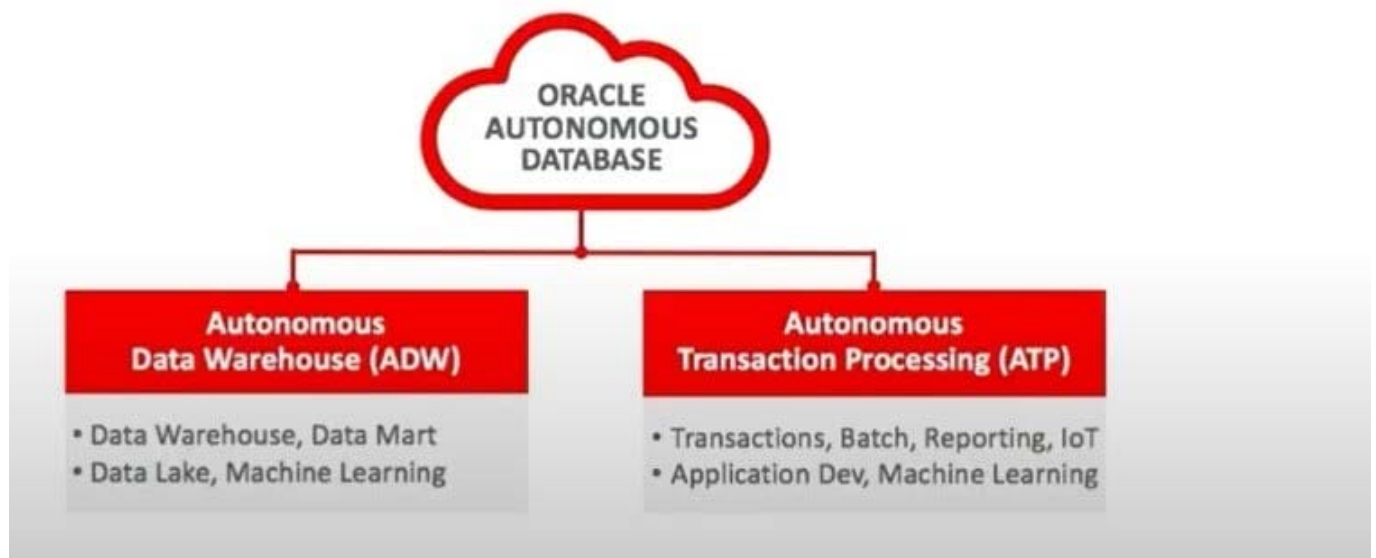

Which three options are available to access data in an Autonomous JSONDatabase?

- A. Oracle Cloud Infrastructure console using the JSON Online Developer tool
- B. Oracle JSON Developer tool downloaded from OTN
- C. NOSQL statements using Oracle SODA drivers
- D. REST API calls to the database (not enabled by default)
- E. Regular Oracle SQL statements using a connection through the listener

Correct Answer: ACD

QUESTION 2**AUTONOMOUS DATABASE SERVICES**

The underlying converged database capabilities of the Oracle Database enable the Autonomous Database to be offered in two editions that are specifically tailored to a workload following Oracle's Best Practice recommendations. Oracle Autonomous Data Warehouse (ADW) is tailored to Data Warehousing, Data Marts, Data Lakes, and Machine Learning workloads. Oracle Autonomous Transaction Processing (ATP) is tailored to On-Line Transaction Processing, Batch, reporting, IoT, application development, machine learning, and mixed workload environments.

In which four ways can Oracle Database optimally access data in Object Storage?

- A. optimized data archive using partitioned external tables
- B. optimized data archive using hybrid partitioned tables
- C. scan avoidance using block skipping when reading parquet and ore files

- D. scan avoidance using columnar pruning for columnar stores like parquet and orc
- E. scan avoidance using partitioned external tables
- F. scan avoidance using columnar pruning for .csv files

Correct Answer: ABDE

QUESTION 3

Which two of the following statements are correct?

- A. ODI Web Edition is available only on Oracle Linux.
- B. ODI Web Edition can be installed from Oracle Cloud Infrastructure (OCI) Marketplace.
- C. The Data Transforms Card provides access to Oracle Data Integrator (ODI) Web Edition.
- D. All of the capabilities of ODI Classic are available with ODI Web Edition,

Correct Answer: AB

QUESTION 4

Which statement is FALSE about Autonomous Database Maintenance on dedicated Exadata infrastructure?

- A. If a scheduled container database maintenance run cannot take place, Oracle will automatically reschedule the container database maintenance for the following quarter.
- B. Autonomous Exadata Infrastructure maintenance takes place at least once each quarter and is mandatory.
- C. You can change your container database maintenance window or reschedule a single container database maintenance run to ensure that your container database maintenance runs follow infrastructure maintenance within the same quarter.
- D. Autonomous Exadata Infrastructure maintenance runs are for infrastructure patching (including patching of the Exadata grid infrastructure code and operating systems updates), and include database patching.

Correct Answer: D

Exadata infrastructure maintenance takes place at least once each quarter and is mandatory.

If a scheduled container database maintenance run cannot take place (because of changes made to infrastructure maintenance scheduling or other reasons), Oracle will automatically reschedule the container database maintenance for the following quarter.

You can change your container database maintenance window or reschedule a single container database maintenance run to ensure that your container database maintenance runs follow infrastructure maintenance within the same quarter. Exadata infrastructure maintenance patches the Exadata infrastructure (including patching of the Exadata grid infrastructure code and operating systems updates), and DO NOT include database patching.

QUESTION 5

When running lots of high concurrent queries in Autonomous Database, you should use which predefined service connection?(Choose the best answer.)

- A. DBNAME_MEDIUM
- B. DBNAME_HIGH
- C. DBNAME_CONCURRENT
- D. DBNAME_LOW

Correct Answer: D
