-  **800,000+** Satisfied Customers

**QUESTION 1**

A customer wants to migrate to Autonomous Database (ADB) but only allows for a very small window of downtime. Golden Gate was advised to be used during the migration. For maximum reassurance of their end-users, the customer also would like to use Golden Gate as a fall-back scenario for the first 6 months after the migration. If customers complain, the on-premise data can be synchronised with the ADB Instance for a switch back.

Which statement about the migration using Golden Gate is correct?

- A. Migration to ADB is not possible using Golden Gate because the apply-process cannot be installed on ADB.
- B. Only the migration to ADB is possible from an on-premise installation of Golden Gate.
- C. Golden Gate on premise is not certified with ADB because Golden Gate Cloud Service exists for this.
- D. The fallback scenario is not possible using Golden Gate because the capture-process cannot be installed on ADB.
- E. The described scenario is correct, can be used for migration and fallback scenarios.

Correct Answer: B

---

**QUESTION 2**

Which two statements are true about the Oracle Cloud Infrastructure (OCI)? (Choose two.)

- A. An OCI region is a localized geographic area, and an availability domain is one or more data centers located within a region.
- B. Because availability domains do not share infrastructure such as power or cooling, or the internal availability domain network, a failure at one availability domain within a region is unlikely to impact the availability of the others within the same region.
- C. A single fault domain can be associated with multiple regions and availability domains.
- D. Regions are dependent on other regions and must be located with 5 thousand kilometers of each other.

Correct Answer: AB

A region is a localized geographic area, and an availability domain is one or more data centers located within a region.

Because availability domains do not share infrastructure such as power or cooling, or the internal availability domain network, a failure at one availability domain within a region is unlikely to impact the availability of the others within the same

region.

**QUESTION 3**

Which Java Database Connectivity (JDBC) thin client version supports the use of HTTP proxy settings that does NOT

support TCP to connect to Autonomous Data Warehouse?

- A. 18.1 onwards
- B. Any version
- C. 17.4 onwards
- D. 12c Release 2 onwards

Correct Answer: A

---

#### QUESTION 4

When exporting a notebook, what type of file is created?

- A. XML
- B. TXT
- C. JSON
- D. SQL
- E. ASCII

Correct Answer: C

---

#### QUESTION 5

Users are required to select a service when connecting to Autonomous Data Warehouse and these services match to one of three different consumer groups: High, Medium, and Low.

Which statement about these consumer groups is correct?

- A. Medium provides intermediate resource and concurrency, and queries run in a serial.
- B. Low provides highest concurrency, lowest resources, and DoP =1.
- C. High provides highest resources, lowest concurrency, and DoP is 1.
- D. High provides highest concurrency and lowest resources, and DoP is 1.

Correct Answer: B
