**QUESTION 1**

You are an administrator with an application running on OCI. The company has a fleet of OCI compute virtual instances behind an OCI Load Balancer. The OCI Load Balancer Backend Set health check API is providing a `Critical` level warning. You have confirmed that your application is running healthy on the backend servers.

What is the possible reason for this `Critical` warning?

- A. A user does not have correct IAM credentials on the Backend Servers.
- B. The Backend Server VCN's Route Table does not include the route for OCI LB.
- C. OCI Load Balancer Listener is not configured correctly.
- D. The Backend Server VCN's Security List does not include the IP range for the source of the health check requests.

Correct Answer: D
