QUESTION 1

Which three are general methods for directly pushing data between cubes? (Choose three.)

A. Copy Data

B. Smart Push

C. Data Management

D. Import Data

E. Data Maps

Correct Answer: ABE

A: You can copy plans from one dimensional intersection to another, including relational data and

supporting detail.

B: About Smart Push

For more meaningful and complete reporting, planners can move comments, attachments, and supporting

detail to multiple cubes. Users can then do more analysis on the planning data coming from the different

cubes.

E: To move data to a reporting cube:

Create the reporting cube.

Click Application, and then click Data Maps.

To the right of a data map, click Action icon, and then select Push Data.

QUESTION 2

Which three functions does the Enterprise Planning and Budgeting Cloud (EPBCS) data load templates allow?

A. Load data directly into Data Management without the need for mappings

B. Import business process data into a specific framework cube

C. Customize the data import process to your application\'s unique requirements

D. Use the EPBCS Import Data feature

E. Allow for a single Excel template to load data to all frameworks without custom modifications

Correct Answer: BCD

B: Essbase is selected as Source Type for the data import to load data in an Essbase data file format. If you select this option, you must choose a cube.

C: Open the templates in Microsoft Excel, and customize them to specify your business data.

D: To import data:
