**QUESTION 1**

Which two components can be installed on the administrator's computer to support Planning and Budgeting Cloud (PBCS)? (Choose two.)

- A. Strategic Modeling
- B. Calculation Manager
- C. EPM Automate
- D. The Simplified User Interface

Correct Answer: BD

The EPM Automate Utility enables Service Administrators to remotely perform tasks in for example Oracle Enterprise Planning and Budgeting Cloud. The EPM Automate Utility installer for Windows and Linux/UNIX is available from the service.

---

**QUESTION 2**

Which statement is true regarding the process of enabling business process framework?

- A. Business process frameworks can be enabled as needed.
- B. All business process frameworks must be enabled at the same time.
- C. All business process frameworks that are needed must be decided upon upfront and enabled at the same time.
- D. Only one business framework can be enabled.

Correct Answer: C

---

**QUESTION 3**

Which two client requirements align with using an ASO plan type alongside the Enterprise Planning and Budgeting Cloud (EPBCS) plan types? (Choose two.)

- A. Due to sparse dimensionality, Aggregation times are slow in EPBCS.
- B. The client would like to plan revenue by Product and Services dimensions.
- C. The client would like to report the results of the allocation process by Entity.
- D. The client would like to store 10 years of actual history for reporting purposes but only requires prior year history for planning purposes.
- E. The client has 10 dimensions in the EPBCS application and needs to report at each intersection.

Correct Answer: AE

The advantage of creating these Aggregate Storage Option (ASO) cubes is obviously for reporting capabilities. With any application that utilizes a large dimension set with several sparse members, ASO cubes make reporting on data much faster.
