**QUESTION 1**

Your client has the following requirements:

1.
Perform restricted party screening using first name, last name, address, and country using the DICE algorithm.
2.
Screen the company name to check if the word NUCLEAR or ATOMIC is part of the company name.

Which option will meet the requirements?

- A. Requirement 1 can be met, but Requirement 2 cannot be met.
- B. Requirements can be met by configuring separate Service Preference and Service Parameter, and by making multiple restricted party screening requests using an agent.
- C. Requirements can be met by configuring multiple Service Parameters in a single Service Preference and by calling the restricted party screening using an agent with the service preference.
- D. Requirements can be met with a custom stored procedure for requirement 2 along with a restricted party screening for requirement 1, because ONLY ONE restricted party screening request can be made using an agent.

Correct Answer: B

QUESTION 2

Which three options correctly define the need for Product Classification Code to be assigned to an item in GTM? (Choose three.)

- A. to store the revision number of an item so that it can be printed in commercial invoices for creating customs
- B. to use within a compliance rule to help determine if a license is required for shipping a specific item to a given country
- C. to provide the information for customs filing or printing in documents
- D. to determine the value of the customs tariff for an item for calculating the duty to be paid for an item
- E. to store the dimensions of the item so that can be printed in shipping documents

Correct Answer: BCD

QUESTION 3

Which two statements are true about Regions created using CSV templates? (Choose two.)

- A. You can upload a Region by using the CSV process only when you are creating Regions using Location ID and not Country ID.

- B. The formulated Region has to be run only once when you load the Region by using CSV. Subsequent updates using CSV upload do not require formulating the Region.
- C. A Region created using the UI cannot be updated using the CSV upload process.
- D. The loaded flag has to be set to "N" when you are uploading a Region using CSV for the formulated Region to work.
- E. You need to formulate a Region after it is uploaded using CSV.

Correct Answer: BD

QUESTION 4

Your client has the following requirement:

1.
Determine the product classification for a configure-to-order product based on a child-line product classification.
2.
The child-line product classification should be based on the component item's product
3.
If any of the transaction lines have an encrypted product, the product classification at the parent level should be different from the case when none of the child lines have an encrypted product.

Which three setups are required to meet this requirement? (Choose three.)

- A. Develop Agent logic to find the parent product classification based on the child-line product classification.
- B. Link each child line to the parent kit line using a parent line linkage for the Transaction Line.
- C. Maintain the Encrypted Flag as a remark.
- D. Maintain the Encrypted Flag as a product classification type.
- E. Link each child line to the parent kit line by creating remarks for the Transaction Line.

F. Configure Compliance Rules to find the parent product classification based on the child-line product classification.

Correct Answer: BDF

QUESTION 5

Which three options are supported in Oracle GTM when creating a Declaration? (Choose three.)

- A. One Trade Transaction to many Declarations
- B. One Order Release to many Declarations
- C. Many Trade Transactions to one Declaration
- D. One Trade Transaction to one Declaration
- E. One Order Release to one Declaration

Correct Answer: CDE
