QUESTION 1

A Service Order Orchestrator determines the steps required to complete the service.

As an example, based on the state of the service point, what does the Enable Service Orchestrator determine the actions for?

A. Create a Device Configuration; Install a Device; Turn on the Device

B. Connect the Service Point; Install a Device; Create a Usage Subscription

C. Create a Service Point; Install a Device; Turn on the Device

D. Connect the Service Point; Install a Device; Turn on the Device

Correct Answer: C

QUESTION 2

For a customer to receive a Subscription communication, what must they have?

A. an active address contact preference

B. an active address type preference

C. an active person contact preference

D. an active account contact preference

Correct Answer: D

QUESTION 3

Your client has three requirements:

1.

 Apply validations on meter reads coming from the Data Collectors.

2.

 If a meter read does not pass the validation, an error will be generated and assigned to a user.

3.

 Retry the validation every 30 minutes for the errors in case the issue is related to configuration. Which statement describes the base functions you should use?

A. If a To Do entry is created on the VEE exception, the IMD\\'s Next Retry Date/Time is set to 30 minutes, and then processed by the algorithm D1-COMP-TD (Complete To Do Entries).

B. If a To Do entry is created on the VEE exception, the IMD\\'s Next Retry Date/Time is set to 30 minutes, and then processed by the algorithm D1-IMD-RETRY (Retry Initial Measurement Data Processing)

C. If a To Do entry is created on the VEE exception, the user will need to discard the IMD and a new IMD will be loaded after 30 minutes.

D. If a To Do entry is created on the VEE exception, the IMD\\'s Next Retry Date/Time is set to 30 minutes, and then processed by the algorithm D1-CRE-IMDTD (Create To Do)

E. If a To Do entry is created on the VEE exception, the user will need to discard the IMD and a new IMD will be manually loaded.

Correct Answer: D

QUESTION 4

Which statement is true about specifications?

A. Specifications include the inspection history of an asset.

B. Specifications apply only to assets and not to components.

C. Specifications can include peer specifications.

D. A single specification can only be used on one asset.

Correct Answer: D

QUESTION 5

Which four statements correctly describe what a Service Agreement Type controls? (Choose four.)

A. It controls the Late Payment Charge Calculation Method.

B. It controls the Service Type to be billed.

C. It controls the valid Rates that can be applied to the service agreement type.

D. It controls debt age.

E. It controls where the bill is to be sent.

Correct Answer: ABCD
