-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Refer to the exhibit.

```
switch1# configure terminal
switch1 (config)# interface ethernet 1/10
switch1 (config-if)# switchport mode trunk
switch1 (config-if)# switchport mode access
switch1 (config-if)# switchport access vlan 10
```

Which option is the effect of this configuration?

- A. It configures the switch port for trunk only.
- B. It configures the switch port for voice traffic.
- C. It configures the switch port for access and trunk.
- D. It configures the switch port for access only.

Correct Answer: D

A port can either be an access or a trunk port, so since the mode access was configured last the running config will show that the "switchport mode trunk" was automatically deleted.

---

**QUESTION 2**

What three pieces of information can be used in an extended access list to filter traffic? (Choose three.)

- A. protocol
- B. VLAN number
- C. TCP or UDP port numbers
- D. source switch port number
- E. source IP address and destination IP address
- F. source MAC address and destination MAC address

Correct Answer: ACE

---

### QUESTION 3

Which two commands debug a PPPoE connection that has failed to establish? (Choose two.)

- A. Debug ppp compression
- B. Debug ppp negotiation
- C. Debug dialer events
- D. Debug ppp cbcp
- E. Debug dialer packet

Correct Answer: BE

---

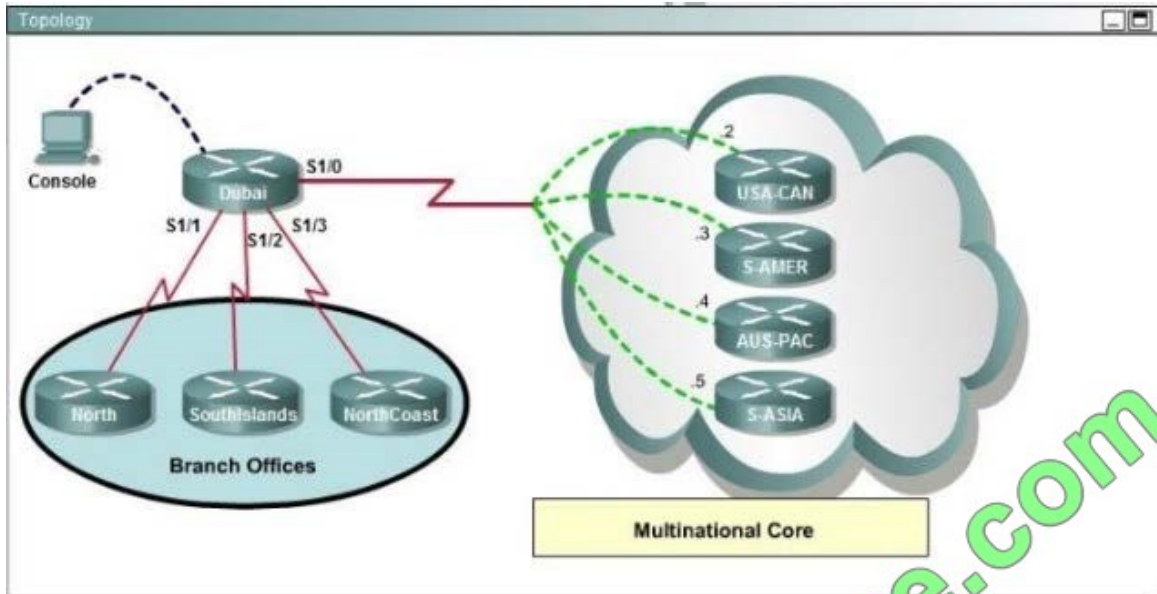

### QUESTION 4

Instructions:

Enter IOS commands on the Dubai router to verify network operation and answer for multiple-choice questions. THIS TASK DOES NOT REQUIRE DEVICE CONFIGURATION.

Click on the Console PC to gain access to the console of the router. No console or enable passwords are required.

To access the multiple-choice questions, click of the numbered boxes on the left of the top panel.

What would be the destination Layer 2 address in the frame header for a frame that is being forwarded by Dubai to the host address of 172.30.4.4?

- A. 825
- B. 230
- C. 694
- D. 387

Correct Answer: C

According to command output 172.30.4.4 is using the 694 dlcI value.

#### QUESTION 5

Which statement describes the process ID that is used to run OSPF on a router?

- A. It is globally significant and is used to represent the AS number.
- B. It is locally significant and is used to identify an instance of the OSPF database.
- C. It is globally significant and is used to identify OSPF stub areas.
- D. It is locally significant and must be the same throughout an area.

Correct Answer: B

The Process ID for OSPF on a router is only locally significant and you can use the same number on each router, or each router can have a different number -it just doesn't matter. The numbers you can use are from 1 to 65,535. Don't get this confused with area numbers, which can be from 0 to 4.2 billion.
