Correct Answer: CD

---

#### QUESTION 3

Which two next generation encryption algorithms does Cisco recommend? (Choose two)

- A. AES
- B. 3DES
- C. DES
- D. MD5
- E. DH-1024
- F. SHA-384

Correct Answer: AF

---

#### QUESTION 4

Which type of PVLAN port allows a host in the same VLAN to communicate only with promiscuous hosts?

- A. Community host in the PVLAN
- B. Isolated host in the PVLAN
- C. Promiscuous host in the PVLAN
- D. Span for host in the PVLAN

Correct Answer: B

The types of private VLAN ports are as follows: + Promiscuous - The promiscuous port can communicate with all interfaces, including the community and isolated host ports, that belong to those secondary VLANs associated to the promiscuous port and associated with the primary VLAN + Isolated - This port has complete isolation from other ports within the same private VLAN domain, except that it can communicate with associated promiscuous ports. + Community -- A community port is a host port that belongs to a community secondary VLAN. Community ports communicate with other ports in the same community VLAN and with associated promiscuous ports. These interfaces are isolated from all other interfaces in other communities and from all isolated ports within the private VLAN domain. <http://www.cisco.com/c/en/us/td/docs/switches/datacenter/nexus5000/sw/configuration/guide/cli/CLIConfigurationGuide/PrivateVLANs.html#42874>

---

#### QUESTION 5

Zone based firewall:

- A. enable zones first / zones must be made before applying interfaces.
- B. enable zones first

Correct Answer: A
