**QUESTION 1**

You are using expandable resource pools in your VMware cluster to ensure each environment is allocated the appropriate resources. There is a resource pool for your development environment that has a reservation of 5 GHz CPU and 12 GB of memory. There is a child resource pool of the development resource pool named Sandbox that has a reservation of 1 GHz CPU and 4 GB of memory. You create four new virtual machines with 4 GB of memory in the Sandbox environment.

In this scenario, which statement is true?

- A. Only one of the new virtual machines will power on.
- B. All new virtual machines will power on.
- C. Only three of the new virtual machines will power on.
- D. No new virtual machines will power on.

Correct Answer: B

QUESTION 2

A new Vblock® System 720 customer is interested in managing initiator groups and monitoring virtual provisioning.

Which element manager would you recommend?

- A. VCE Vision™ Intelligent Operations
- B. Unisphere
- C. UCSM
- D. Data Center Network Manager

Correct Answer: B

QUESTION 3

You are using the default settings for VCE Vision™ Intelligent Operations. Three minutes after an event is reported in UCSM, it is still not reported in Vision.

Which statement is correct?

- A. Verify the network connection between the system library virtual machine to the UCSM's virtual IP address.
- B. VCE Vision™ software login credentials on vCenter may be incorrect.
- C. Verify your HTTP settings in UCSM.
- D. VCE Vision software is operating as expected.

Correct Answer: D

QUESTION 4

You are asked to create a new UCS template for an upcoming project. What information is required for the template? (Choose two)

- A. Fully qualified domain names for each UCS blade
- B. The World Wide Node Name (WWNN) pool to use
- C. The vNIC adapter policy
- D. The template UUID

Correct Answer: BC

QUESTION 5

A customer is interested in executing the VCE Vision™ Intelligent Operations Compliance Checker. What is required to access the local RCM data?

- A. CAS authentication credentials for the administrator
- B. vSphere administrator credentials
- C. Administrator authentication to VCE Vision™ Intelligent Operations
- D. Full access rights to the RCM

Correct Answer: A
