B. Hiding the network portion of an IPv4 address

C. Connecting multiple devices through a single public IP address

D. Resolving alphanumeric names to addresses

Correct Answer: C

QUESTION 2

An engineering company is experiencing issues When accessing multi-gigabyte files from their local drives. It can take a very long time to access the files but once they are opened speeds are acceptable. Which of the following recommendations will a technician MOST likely make?

A. Install SSDs in the machines

B. Add a NIC to support 1Gbps

C. Upgrade the RAM to a higher speed

D. Replace the current processors with higher clock-rate CPUs

Correct Answer: A

QUESTION 3

A technician has noticed that when at company headquarters the laptop connection to the Internet is more responsive than when using the company-provided phone as a hotspot. The technician updated the drivers on the WiFi NIC without resolution and then verified the configuration on the WiFi was correct.

Which of the following configurations could cause the decreased performance?

A. The connection if throttled.

B. There is a low RFID signal.

C. SSID is not found.

D. It is out of range.

Correct Answer: A

QUESTION 4

A technician is conguring a new IAN for a client. The technician deploys a DHCP sewer with the following settings

IP address range:	192.168.2.10 - 192.168.3.255
Subnet mask:	255.255.128.0
Gateway address:	192.168.254.1
DNS server:	172.16.0.55
WINS server:	192.168.2.199

Alter the technician adds clients to the LAN, none of them can contact the Internet which of the following is the MOST likely cause of this issue?

A. The DNS sewer needs to be within the same LAN as the clients for it to function

B. A WINS sewer should not be used when DNS is needed.

C. The gateway address is not reachable from the LAN.

D. The IP address range is not usable with that subnet mask.

Correct Answer: C

QUESTION 5

A user reports trouble with the network connection on a workstation. The user was initially able to receive emails but received an error when trying to send messages. The user is able to authenticate to the domain successfully and can see data in the network shares. Which of the following should the user perform FIRST when trying to resolve this issue?

A. Update the NIC drivers

B. Assign a static IP address

C. Change the DNS servers.

D. Check the SMTP server.

Correct Answer: D
