**QUESTION 1**

A network administrator is troubleshooting a notebook that is not loading the local Windows 10 operating system. All the computers inside the company are installed using UEFI mode selected. The message on the screen shows a failed attempt to connect to a PXE server. When requested, the end user reported trying to improve the computer's speed by changing some BIOS configurations randomly. Which of the following should the network administrator check FIRST inside BIOS?

- A. C-states should be configured to 2
- B. Secure Boot should be enabled
- C. Wake-on-LAN should be unchecked
- D. The PXE server address should be set

Correct Answer: D

QUESTION 2

A user's smartphone has been slow recently. A technician sees the phone was purchased two months ago, and it is top of the line. About a month ago, a new OS update was installed. To address the issue, the technician runs a hardware diagnostic on the device, and it reports no problems. Which of the following is MOST likely the cause of the performance issue on the device?

- A. Too many applications are running updates
- B. The device is currently running in airplane mode
- C. The internal memory is failing on the device
- D. The OS update is too resource intensive for the device

Correct Answer: A

QUESTION 3

A customer is using a cloud storage program that maintains a copy of local files on the cloud storage servers. The WiFi network is not very fast, and the customer uses bandwidth-intensive video streaming all day. Which of the following parameters should be adjusted to keep the cloud storage program from using too much bandwidth?

- A. Synchronization settings
- B. Wireless settings
- C. Video streaming settings
- D. QoS settings

Correct Answer: D

**QUESTION 4**

A user is having a problem with printing a specific document type.

The network printer OCP shows that the printer is online with no errors. Other users are not having the same issue. The user sends the document to another printer and the document prints. Which of the following should a technician do FIRST in troubleshooting the problem?

- A. Stop and restart the PC print spooler service.
- B. Verify the user is sending the document to the correct printer queue.
- C. Have each user send the same document to the correct printer queue.
- D. Stop and restart the print server queues, and then have the user resend the document.

Correct Answer: B

QUESTION 5

A technician has built a custom workstation for an end user. The end user reports that the workstation ran for a few minutes and then crashed. When the user subsequently boots the workstation, it crashes much more quickly. Which of the following did the technician forget to do when building the workstation?

- A. Apply thermal paste.
- B. Connect the case fans.
- C. Configure integrated GPU.
- D. Overclock the CPU.

Correct Answer: B
