QUESTION 1

A user receives an error message from an online banking site that states the following:

Your connection is not private. Authority invalid.

Which of the following actions should the user take NEXT?

- A. Proceed to the site.
- B. Use a different browser.
- C. Report the error to the bank.
- D. Reinstall the browser.

Correct Answer: C

The error message "Your connection is not private. Authority invalid." means that the web browser cannot verify the identity or security of the website's SSL certificate. This could indicate that the website has been compromised, has a configuration error, or has an expired or invalid certificate. The user should not proceed to the site or use a different browser, as this could expose their sensitive information to potential attackers. The user should also not reinstall the browser, as this is unlikely to fix the error and could cause data loss. The best action for the user to take is to report the error to the bank and wait for them to resolve it. QUESTION 2

Which of the following operating systems is most commonly used in embedded systems?

- A. Chrome OS
- B. macOS
- C. Windows
- D. Linux

Correct Answer: D

Linux is the most commonly used operating system in embedded systems because it is open source, free, customizable, and supports a wide range of architectures and devices. Linux also offers many advantages for embedded development, such as real-time capabilities, modularity, security, scalability, and reliability. Linux can run on embedded systems with limited resources, such as memory, storage, or power, and can be tailored to the specific needs of the application. Linux also has a large and active community of developers and users who contribute to its improvement and innovation. Some examples of embedded systems that use Linux are smart TVs, routers, drones, robots, smart watches, and IoT devices

QUESTION 3

A technician downloaded software from the Internet that required the technician to scroll through a text box and at the end of the text box, click a button labeled Accept

Which of the following agreements IS MOST likely in use?

- A. DRM
- B. NDA
- C. EULA
- D. MOU

Correct Answer: C

The most likely agreement in use here is a EULA (End User License Agreement). This is a legally binding agreement between the user and the software developer, outlining the terms and conditions that the user must agree to in order to use the software. It is important that the user understands and agrees to the EULA before they can proceed with downloading and installing the software. As stated in the CompTIA A+ Core 2 exam objectives, users should be aware of the EULA before downloading any software.

QUESTION 4

A technician is trying to remove a resilient computer virus. The virus keeps coming back after rebooting the system because some program or service has locked some of the virus's files and is preventing the AV from cleaning the system. Which of the following is the BEST approach to try and remove the virus while minimizing negative impact to the system?

- A. Use REGSRV32 to deregister the virus DLLs.
- B. Run the antivirus after rebooting in safe mode.
- C. Use the repair disk and follow the prompts.
- D. Use the recovery console to disable all windows services.

Correct Answer: B

QUESTION 5

A customer reports that a networked printer is not printing documents. The technician successfully pings the printer's IP address. Which of the following could be the problem? (Select TWO).

- A. The network cable is unplugged.
- B. The printer is low on toner.
- C. The gateway address on the printer is incorrect.
- D. The printer is out of paper.
- E. The spooler is not functioning.

Correct Answer: DE
