QUESTION 1

Which of the following authentication types is the most secure?

A. WPA3

B. WEP

C. RADIUS

D. TACACS+\

E. WPS

Correct Answer: A

QUESTION 2

Following a recent power outage, several computers have been receiving errors when booting. The technician suspects file corruption has occurred. Which of the following steps should the technician try FIRST to correct the issue?

A. Rebuild the Windows profiles.

B. Restore the computers from backup.

C. Reimage the computers.

D. Run the System File Checker.

Correct Answer: D

The technician should run the System File Checker (SFC) first to correct file corruption errors on computers after a power outage. SFC is a command-line utility that scans for and repairs corrupted system files. It can be run from the command prompt or from the Windows Recovery Environment. Rebuilding the Windows profiles, restoring the computers from backup, and reimaging the computers are more drastic measures that should be taken only if SFC fails to correct the issue

QUESTION 3

Which of the following is the Windows OS that only recognizes 4GB of RAM?

A. The Home version OS

B. The 32-bit OS

C. The 64-bit OS

D. The trial version OS

Correct Answer: B

A. Uninstalling the application

B. Gaining root access to the tablet

C. Resetting he web browser cache

D. Deleting the application cache

E. Clearing the application storage

F. Disabling mobile device management

Correct Answer: DE

QUESTION 5

A systems administrator is setting up a Windows computer for a new user Corporate policy requires a least privilege environment. The user will need to access advanced features and configuration settings for several applications. Which of the following BEST describes the account access level the user will need?

A. Power user account

B. Standard account

C. Guest account

D. Administrator account

Correct Answer: B

The account access level the user will need to access advanced features and configuration settings for several applications while adhering to corporate policy requiring a least privilege environment is a standard account. This is because a standard account allows the user to access advanced features and configuration settings for several applications while adhering to corporate policy requiring a least privilege environment
