QUESTION 1

A Case Team is using too much storage space. The Storage Administrator learns from the Case Team that each case uses a unique copy of collected data if particular files have already been collected for another case. The Storage Administrator asks the Case Team to identify options to free storage space. Which steps can the Case Team perform to increase free space?

A. When the same set of files will be used across multiple cases, keep only one copy of those files and point each case to that copy.

B. For cases that are inactive, delete the data from the file servers. Recollect it as needed if the cases become active again.

C. Archive any cases that are inactive, delete the data from the file servers, and recollect it as needed if the cases again become active again.

D. Archive any cases that are inactive, create a copy set of the source data preserving the file metadata, and restore the copy set and the case archive for any cases that become active again.

Correct Answer: D

QUESTION 2

A Case Team discovers that the Symantec Clearweli eDiscovery Platform 7.x Legal Hold license Custodian Capacity is unable to accommodate extensive, imminent litigation. The Case Team is unable to purchase additional licensing due to budget constraints.
