**QUESTION 1**

A Deployment Solution administrator is creating a job to capture an image of a computer's hard drive using a Disk Image task. What should precede the Disk Image task?

- A. a task to run Sysprep
- B. a task to defrag the disk
- C. a task to run PC Transplant
- D. a task to capture the computer's OS license key

Correct Answer: A

---

**QUESTION 2**

Which Patch Management option enables error checking on Differential mode replication?

- A. Verity Data Integrity
- B. Verity Differential Integrity Check
- C. Verity Differential Replication
- D. Verity Replication Mode

Correct Answer: A

---

**QUESTION 3**

A system administrator needs to deploy the pcAnywhere plug-in to a subset of the Windows desktop computers in an environment. After selecting the named policy in the "Applied to" section of Altiris Client Management Suite 7.1 / 7.x, how should the administrator modify the targeted agent policy?

- A. Update results, click OK to save the changes, and then click Save Changes.
- B. Edit the SQL of the named policy, add a filter rule, update results, click OK to save the changes, and then click Save Changes.
- C. Edit the named policy, add a filter rule, update results, click OK to save the changes, and then click Save Changes.
- D. Create a new SQL statement for a new named policy, add a filter rule, update results, click OK to save the changes, and then click Save Changes.

Correct Answer: C

---

**QUESTION 4**

An inventory policy is set to run weekly at 18:00 on Wednesdays and is present on all computers. However, a user shuts down a laptop right after the inventory starts at 18:00 and turns it on the next morning at 08:00. When will the inventory run?

- A. Thursday morning at 08:00
- B. next Wednesday evening at 18:00
- C. Thursday evening at 18:00
- D. never

Correct Answer: B

---

#### QUESTION 5

A school with a limited budget either receives computers as donations or buys them in small quantities. As a result, the school has several varieties of computers and associated hardware. Each quarter, all student computers must be reset to a fresh state to prepare for the next group of students. When the computers are reset, the OS is manually installed, all of the drivers for each unique system are installed, and each application is installed one at a time by CD. The process is cost effective, but highly prone to error and often results in several days of clean-up by the teachers. Which two benefits would the school realize by using Deployment Solution? (Select two.)

- A. It can automate the application installations through use of the Software Portal.
- B. It can install the operating systems automatically using a Scripted OS Installation.
- C. It can manage the drivers for each system through use of Prepare the Image tasks.
- D. It can install the operating system automatically through use of PC Transplant.
- E. It can automate the application installations through use of Restore Software tasks.
- F. It can automate driver installation through use of Deploy Anywhere.

Correct Answer: BF
