QUESTION 2

How should a DLP administrator change a policy so that it retains the original file when an endpoint incident has detected a "copy to USB device" operation?

- A. Add a "Limit Incident Data Retention" response rule with "Retain Original Message" option selected.
- B. Modify the agent config.db to include the file
- C. Modify the "Endpoint_Retain_Files.int" setting in the Endpoint server configuration
- D. Modify the agent configuration and select the option "Retain Original Files"

Correct Answer: A

QUESTION 3

Which channel does Endpoint Prevent protect using Device Control?

- A. Bluetooth
- B. USB storage
- C. CD/DVD
- D. Network card

Correct Answer: B

QUESTION 4

Under the "System Overview" in the Enforce management console, the status of a Network Monitor detection server is shown as "Running Selected." The Network Monitor server's event logs indicate that the packet capture and filereader processes are crashing.

What is a possible cause for the Network Monitor server being in this state?

- A. There is insufficient disk space on the Network Monitor server.
- B. The Network Monitor server's certificate is corrupt or missing.
- C. The Network Monitor server's license file has expired.
- D. The Enforce and Network Monitor servers are running different versions of DLP.

Correct Answer: D

QUESTION 5

A DLP administrator has performed a test deployment of the DLP 15.0 Endpoint agent and now wants to uninstall the agent. However, the administrator no longer remembers the uninstall password. What should the administrator do to work around the password problem?

- A. Apply a new global agent uninstall password in the Enforce management console.
- B. Manually delete all the Endpoint agent files from the test computer and install a new agent package.
- C. Replace the PGPsdk.dll file on the agent's assigned Endpoint server with a copy from a different Endpoint server
- D. Use the UninstallPwdGenerator to create an UninstallPasswordKey.

Correct Answer: D
