QUESTION 1

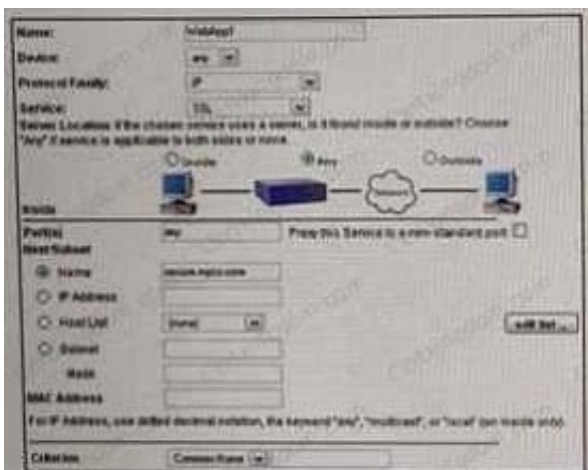

Which PacketShaper parameter could an administrator apply to the Folder class?

- A. Policy
- B. Partition
- C. Outbound/Default classification
- D. Matching rule

Correct Answer: C

QUESTION 2

Refer to the exhibit.

A single web server is accessible only through SSI; it is running two different applications. The WebApp1 class is created with the values shown.

Which field (other than the name) would need to change to create a class for WcbApp2 running over SSL?

- A. Service Group
- B. Device
- C. Criterion > Common Name
- D. Criterenon >URL

Correct Answer: C

**QUESTION 3**

Refer to the exhibit.

The screenshot shows a firewall configuration interface with two main sections: 'Inside' and 'Outside'. Both sections have a 'Port(s)' field set to 'any'. Below the 'Port(s)' field is a checkbox labeled 'Proxy this Service to a non-standard port'. The 'Host/Subnet' section in both columns has radio buttons for 'Name', 'IP Address', 'Host List', and 'Subnet', followed by a 'Mask' field. In the 'Inside' section, the 'Host List' radio button is selected, and a dropdown menu is open showing 'Host DNS Name or IP Address', 'URL', 'Content Type', and 'Web Browser or User Agent'. The 'Host List' dropdown is also open, showing 'Host DNS Name or IP Address' selected. The 'MAC Address' field is present in both sections. At the bottom, the 'Criterion' dropdown is set to 'Host DNS Name or IP Address'.

Which attribute is used to create a class that matches web traffic from all subdomains within CNN's website?

- A. *.CNN.com in the Criterion field for the Host DNS name or IP Address
- B. http://VCNN.com in the Criterion field for the URL
- C. *.CNN.com in the Name field under the inside column
- D. http://*.CNN.com in the Name field under the outside column

Correct Answer: B

QUESTION 4

Which statement accurately describes the PacketShaper measurement engine?

- A. It collects histogram data that can be backed up to the PacketShaper
- B. Its data is stored in tab-delimited lists
- C. It collects histogram data that can be exported to a device

D. It is a background process that collects traffic tree data

Correct Answer: C

QUESTION 5

Which type of file can be backed up and used later to restore a PacketShaper configuration?

A. sys.cfg

B. basic.cfg

C. cmd.csv

D. config.lid

Correct Answer: A
