QUESTION 1

Which option is accurate as it relates to the sysLocation parameter?

- A. It is a short string describing the physical location of the host where the server is running.
- B. It is the part of an SNMP public password referring to the physical location where the server is running.
- C. It is a string encoding routing and NAT information to enable SNMP packets to reach the host from other subnets.
- D. It is a path on an SNMP host to distinguish between many agents that may be running on that host.

Correct Answer: B

QUESTION 2

Which option best defines an "unreliable network" within PacketShaper?

- A. It has NO traffic trees defined in the PacketShaper
- B. Its latency is decreased, meaning that the frequency of time-outs and retransmissions spike
- C. It offers no guarantees that packets will NOT be delayed, damaged, or lost
- D. Its acknowledgments are in UDP, NOT TCP

Correct Answer: A

QUESTION 3

Which statement accurately describes rate policies and priority policies?

- A. Priority policies are most appropriate for interactive traffic that is burstable
- B. Rate policies apply only to non-IP traffic
- C. Traffic classes without a specific policy assigned, are allocated no bandwidth
- D. Traffic with rate policies are applied before the priority policy

Correct Answer: C

QUESTION 4

How are classes sorted in a traffic tree?

- A. By service precedence
- B. By priority, rate and average utilization
- C. By parent, child, and sibling relationships
- D. By server port number

Correct Answer: C

Explanation: <https://originsymwisedownload.symantec.com/resources/webguides/packetguide/11.5/Content/Topics/overviews/tree-overview-legacy.htm>

QUESTION 5

Which statement about dynamic partitions is true?

- A. All fixed partitions are converted to dynamic as users become active in a traffic class
- B. They can only be configured for the aggregate traffic class
- C. Child class partitions, automatically convert the parent class into dynamic partitions
- D. The minimum subpartition size is 1024 bps

Correct Answer: A
