**QUESTION 1**

The default group type for all Security Policies is:

- A. Application_Servers
- B. ByFunction
- C. ByLocation
- D. Automatic

Correct Answer: C

QUESTION 2

In order to create an interactive view on Cascade Pilot:

- A. Select two views from the views panel using control-click then right click on one and select "Create Interactive View" from the drop-down menu.
- B. After a Drill-Down from one view to another, right click on the Drill-Down view in the sources panel and select "Create Interactive View" from the drop-down menu.
- C. Select any item (such as a host IP Address, Port or Protocol name) in the main workspace and right click on the item, then select "Create Interactive View" from the drop-down menu.
- D. Select any view in the views panel, right-click it and select "Create Interactive View" from the drop-down menu.
- E. Open the filters panel, apply an existing or new filter to the view then select "save as interactive view" from the home menu.

Correct Answer: B

QUESTION 3

One advantage of using a trace clip for analysis within Cascade Pilot instead of its parent capture job trace is:

- A. The trace clip is likely smaller in size, so views load faster.
- B. The trace clip is moved to the local system, so views load faster.
- C. The trace clip has a base set of views pre-applied, so analysis is faster.
- D. The trace clip is guaranteed to have trend/index data, so views load faster.

Correct Answer: A

QUESTION 4

Which content block can be used to compare traffic between two time periods on the Cascade Profiler Dashboard?

- A. Watched list as a bar chart
- B. Watched list as a stacked area chart
- C. Watched list as a line graph
- D. Watched list as a pie chart
- E. Top list as a bar chart

Correct Answer: A

QUESTION 5

On Cascade Profiler, in terms of retention of completed reports and reporting sources (one minute flow and rollup files), which of the following is true? (Select 4)

- A. One minute flow records are deleted from the file system FIFO (oldest first) once the appliance has filled the space that is allocated.
- B. There is a fixed amount of space on the filesystem for completed reports.
- C. A report template can be marked "keep until I delete it" so that any reports that are scheduled with this template are not automatically deleted from the filesystem.
- D. When the flows or rollup records have been deleted from the filesystem, any saved report that was generated from those flow sources is no longer available.
- E. Users have the ability to allocate additional space to the 1 min flow logs in order to increase retention. This is done at the expense of other rollup resolutions.

Correct Answer: ABCE
