**QUESTION 1**

A vRealize Automation administrator notices that when requesting a specific blueprint, machines are provisioned to different compute resources.

Which two tasks should the administrator complete to ensure that the machines provisioned from the blueprint are always placed on the same compute resource? (Choose two.)

- A. Create a new reservation and assign it to a business group.
- B. Assign a reservation to a compute resource.
- C. Create a new fabric group.
- D. Assign a reservation policy to the blueprint.
- E. Create a reservation policy and assign it to a single reservation.

Correct Answer: BC

---

**QUESTION 2**

Which option in a composite blueprint's settings allows an architect to modify the CPU and memory limits of provisioned virtual machines?

- A. Increase number of instances
- B. Propagate updates to existing deployments
- C. Make available as a component in the design canvas
- D. Make provisioned resources scalable

Correct Answer: D

---

**QUESTION 3**

A vRealize Orchestrator administrator is tasked with creating a workflow that processes sensitive information that is subject to auditing. All workflow messages must be stored in the vRealize Orchestrator database.

How can the administrator ensure that all log messages generated by the workflow are stored in the database?

- A. Configure a DEBUG level for the vRealize Orchestrator server.
- B. Use System.log() when printing out messages.
- C. Configure SQL plugin to write to the database directly.
- D. Use Server.log() when printing out messages.

Correct Answer: A

---

#### QUESTION 4

Which two pieces of information can be used to search for machines to reclaim in order to conserve resources? (Choose two.)

- A. Last usage date range
- B. Number of CPUs
- C. Number of disks attached
- D. Memory usage
- E. Expiration date range

Correct Answer: DE
