**QUESTION 1**

Although an organization has sufficient capacity within the on-premises VMware SDDC, the CTO has decided to evolve the public cloud strategy into a “Right Cloud First” strategy. To support this, the administrator has suggested the use of vRealize Automation to provide a consistent portal with a multi-cloud service catalog to enable the users to use self-service to deploy workloads into different clouds. The administrator needs to configure cloud accounts for public clouds to support the new strategy.

Which two of the public clouds are supported platforms? (Choose two.)

- A. Microsoft Azure
- B. IBM Cloud
- C. Google Cloud Platform
- D. Oracle Cloud
- E. OVH Cloud

Correct Answer: AC

QUESTION 2

An administrator creates a content source to import three Cloud Assembly cloud templates into Service Broker. After some time, he is tasked with deleting the content source.

What would happen if and when this content source is deleted?

- A. All three cloud templates are deleted from Service Broker and Cloud Assembly.
- B. All three cloud templates are deleted from Service Broker.
- C. Only the content source is deleted but the cloud templates remain intact in Service Broker.
- D. Once created, a content source cannot be deleted.

Correct Answer: C

QUESTION 3

When deploying the SaltStack Config service using vRealize Suite Lifecycle Manager, which construct is automatically created in Cloud Assembly to assist in deploying SaltStack Config minions using cloud templates?

- A. A custom resource

- B. A property group
- C. A custom role
- D. A secret

Correct Answer: B

QUESTION 4

An administrator is preparing to deploy vRealize Automation into production in one of several geodistributed datacenters.

For which type of deployment should the administrator plan while confirming resource capacity? (Choose the best answer.)

- A. Standard
- B. Multi-site
- C. Distributed
- D. Clustered

Correct Answer: D

QUESTION 5

An administrator is building a cloud template to allow users to select a cloud type. The cloud type options are:

1.
Amazon Web Services
2.
vSphere

Where will the administrator configure capability tags so that the proper compute is selected at the time of deployment?

- A. Projects
- B. Cloud Zones
- C. Network Profile
- D. Cloud Accounts

Correct Answer: B
