**QUESTION 1**

DRAG DROP

Drag and drop the Anywhere Workspace components on the left to their respective function on the right.

Select and Place:

**Anywhere Workspace Component**

Workspace ONE UEM

Workspace ONE Access

VMware Horizon

**Function Provided**

Ensures that the end user devices are in compliance with the organization's IT policies.

Delivers a virtual desktop and application infrastructure.

Provides authentication and conditional access to resources.

Correct Answer:

## Anywhere Workspace Component

### Function Provided

Workspace ONE UEM

Ensures that the end user devices are in compliance with the organization's IT policies.

VMware Horizon

Delivers a virtual desktop and application infrastructure.

Workspace ONE Access

Provides authentication and conditional access to resources.

Workspace ONE Access provides multi-factor authentication, conditional

### QUESTION 2

A Horizon administrator wants to implement Dynamic Environment Manager so that application configuration data is injected when the application is started. Which option would provide this feature?

- A. DirectFlex
- B. Application Migration
- C. Group Policies
- D. Triggered Tasks

Correct Answer: A

<https://docs.vmware.com/en/VMware-Dynamic-Environment-Manager/9.8/com.vmware.user.environment.manager-adminguide/GUID-1912F58E-716A-474D-B09B-26DD1C509679.html>

### QUESTION 3

An administrator configured a virtual machine to use an NVIDIA card but the virtual machine is not starting up. What could be the cause of the issue? (Choose two.)

- A. No suitable host could be found.
- B. Not all memory has been reserved on the VM.
- C. Not all CPU has been reserved on the VM.
- D. The Desktop Pool doesn't support 3D cards.
- E. 3D graphics cannot be used with local storage.

Correct Answer: AB

Reference: <https://techzone.vmware.com/resource/deploying-hardware-accelerated-graphics-vmware-horizon-7#horizon-pool-and-farm-settings>

If you configure a graphics card, and the host has no resources available (all GPU memory used for example) or not all guest memory has been reserved, then the VM won't start. By process of elimination: Not all CPU has been reserved on the VM -> CPU reservation not necessary The Desktop Pool doesn't support 3D cards -> There is no mention of Horizon within this question. 3D Graphics cannot be used with local storage -> 3D Graphics is not dependant on storage.

---

#### QUESTION 4

An administrator has added a support PCI graphics accelerator to a virtual machine configuration. Which the administrator tries to power on the virtual machine, an error is displayed and the virtual machine remains powered off. Which of the following virtual machine configuration settings needs to be applied to enable the virtual machine to power on?

- A. Reserve all guest memory.
- B. Set Memory Shares to High
- C. Enable Video Card 3D Graphics.
- D. Disable CPU Hot Plug.

Correct Answer: A

"In the same New PCI Device window, reserve all memory when creating the VM by clicking Reserve all memory."

#### QUESTION 5

DRAG DROP

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

Select and Place:

**Smart Card Authentication Step**

Obtain the root certificate from the CA

Prepare the AD for smart card authentication

Configure smart card settings in the VMware Horizon console

Add the root certificate to a server's truststore file

**Correct Sequence**

Step 1

Step 2

Step 3

Step 4

Correct Answer:

**Smart Card Authentication Step**

**Correct Sequence**

Step 1

Obtain the root certificate from the CA

Step 2

Add the root certificate to a server's truststore file

Step 3

Configure smart card settings in the VMware Horizon console

Step 4

Prepare the AD for smart card authentication
